global investment agencies seeking to enhance trade in lagging regions. It shows how spatial interaction and agent-based modelling can be used as the basis for developing new plans and policies. An in-depth analysis of trade routes is presented, which can be used to develop policies for increasing efficiency and reducing costs. Landlocked Uganda and the sea-locked South Pacific Islands serve to illustrate the problems of covering sizable distances, accelerating export flows and improving supply chain efficiency. These examples also provide an excellent illustration of the power of regional science, from assembling data bases in difficult situations to developing and

Thomas Aquinas, John Calvin, Martin Luther, and Friedrich Schleiermacher. Author of the Epistle to the Romans, the multi-volume Church Dogmatics, and a wide range of other works - theological, exegetical, historical, political, pastoral, and homiletic - Barth has had significant and perduring influence on the contemporary study of theology and on the life of contemporary churches. In the last few decades, his work has been at the centre of some of the most important interpretative, critical, and constructive developments in in the fields of Christian theology, philosophy of religion, and religious studies. The Oxford Handbook of Karl Barth is the most expansive guide to Barth's

work published to date.

Comprising over forty original chapters, each of which is written by an expert in the field, the Handbook provides rich analysis of Barth's life and context, advances penetrating interpretations of the key elements of his thought, and opens and charts new paths for critical and constructive reflection. In the process, it seeks to illuminate the complex and challenging world of Barth's theology, to engage with it from multiple perspectives, and to communicate something of the joyful nature of theology as Barth conceived it. It will serve as an indispensable resource for undergraduates, postgraduates, academics, and general readers

Without doubt Richard Rorty is one of the most honored, famous and disputed philosophers of our days. All over the world interest in his inspiring and provoking thoughts goes beyond the circles of academic philosophy. The present volume includes "The Brain as Hardware, Culture as Software" and "Philosophy-Envy" of Richard Rorty, papers presented by students of the philosophy department at university of Münster and Rorty's responses to and comments on them. Rorty's lecture has been publicly presented at the 8. Münstersche Vorlesungen zur Philosophie on may 26th 2004. The students presented their

intensively prepared papers on the following day. The volume gives an overview of the main topics of his philosophy as well as a detailed analysis of central concepts. "The papers are of very high quality indeed, and the level of discussion during the day I spent with the students was equally high. I have never, in any university, encountered students who combined such detailed knowledge of my writings with such penetrating criticisms of my views." (Richard Rorty)
