Wikibooks is a useful resource if you're curious about a subject, but you couldn't reference it in academic work. It's also worth noting that although Wikibooks' editors are sharp-eyed, some less scrupulous contributors may plagiarize copyright-protected work by other authors. Some recipes, for example, appear to be paraphrased from well-known chefs.

Accelerate sales and improve customer experience Every day, most working professionals entrust their most important messages to a form of communication that doesn't build trust, provide differentiation, or communicate clearly enough. It's easy to point to the sheer volume of emails, text messages, voicemails, and even social messaging as the problem that reduces our reply rates and diminishes our effectiveness. But the faceless nature of that communication is also to blame. Rehumanize Your Business explains how to dramatically improve relationships and results with your customers, prospects, employees, and recruits by

The ultimate guide to predicting winners and losers in high technology Pip Coburn became famous for writing some of the liveliest reports on Wall Street. He quoted everyone from Machiavelli to HAL, Anaïs Nin to Yoda, Einstein to Gandhi. But along with the quirky writing, he consistently delivered sharp insights into technology trends and helped investors pick stocks with long-term potential. After years of studying countless winners and losers, Coburn has come up with a simple idea that explains why some technologies become huge hits (iPods, DVD players, Netflix), but others never reach more than

a tiny audience (Segways, video phones, tablet PCs). He says that people are only willing to change when the pain of their current situation outweighs the perceived pain of trying something new. In other words, technology demands a change in habits, and that's the leading cause of failure for countless cool inventions. Too many tech companies believe in "build it and they will come"—build something better and people will beat a path to your door. But, as Coburn shows, most potential users are afraid of new technologies, and they need a really great reason to change. The Change Function is an irreverent look at how this pattern plays out in countless sectors, from computers to cell phones to
