It is estimated that only a small fraction, less than 1 per cent, of ancient literature has survived to the present day. The role of Christian authorities in the active suppression and destruction of books in Late Antiquity has received surprisingly little sustained consideration by academics. In an approach that presents evidence for the role played by Christian institutions, writers and saints, this book analyses a broad range of literary and legal sources, some of which have hitherto been little studied. Paying special attention to the problem of which genres and book types were likely to be targeted, the author argues that in addition to heretical, magical, astrological and anti-Christian books, other less obviously subversive categories of literature were also vulnerable to destruction, censorship or suppression through prohibition of the copying of manuscripts. These include texts from materialistic philosophical traditions, texts which were to become the basis for modern philosophy and science. This book examines how Christian authorities, theologians and ideologues suppressed ancient texts and associated ideas at a time of fundamental transformation in the late classical world.

See the US Constitution in a new light with this bold, modern and

Read PDF Ignote Quan Storia Reale E Immaginaria Dell Algebra

accessible illustrated guide to the document that helped define democracy. With the 2020 Presidential election around the corner, there has never been a better time to take a closer look at the Constitution, the bedrock of US politics. Inquisitive minds will have their questions vividly answered – and new ones raised – by a mix of striking illustrations and clear, engaging text, including passages from the Constitution given in plain English. As well as a detailed history covering the original Constitution, the Bill of Rights and all Amendments, discover how this milestone in American democracy shapes and is shaped by the world at large. We The People shows that, far from a fusty old piece of paper, the US Constitution is a living, evolving rulebook that is as relevant today as it has ever been. A fresh take on a monumental document, navigating in style its history and its life today. Excerpts from the Constitution are presented here in plain English to help young thinkers better understand the role it plays in everyday life. Accessible, energetic text accompanied by contemporary, powerful illustrations allows children aged 10 and older to re-think the Constitution in a totally new way. A balanced examination that does not shy away from addressing the difficulties of interpreting and adapting the Constitution for the modern world. We The People takes the Constitution out of its display case, blows off the dust and re-imagines this piece of history for the next generation.

Oz Frankel explores the nineteenth-century roots of the modern "information state," especially the roles of investigative projects and official reports in embedding the state in print culture and refashioning the politics of representation.

officer and military commander. Praetor of the city in 70 and consul in 73 or 74, 98 and 100, he was, about the year 76, sent to Britain as governor. He quelled the Silures of Wales, and began to build a road through their territory; his place was taken by Agricola in 78. In 97 he was given the highly esteemed office of Manager of Aqueducts at Rome. He is known to have been an augur, being succeeded by his friend Pliny the Younger. The two sides of Frontinus' public career are reflected in his two surviving works. *Stratagems*, written after 84, gives examples of military stratagems from Greek and Roman history, for the instruction of Roman officers, in three books; the fourth book is concerned largely with military discipline. *The Aquaducts of Rome*, written in 97-98, gives some historical details and a description of the aqueducts for the water supply of the city, with laws relating to them. Frontinus aimed at being useful and writes in a rather popular style which is both simple and clear.

From the author of *The Spirits of America*, an energetic history of tobacco use.

"The basis for *On Contested Shores* has been under construction since before the Commandant released the planning guidance. As career Marine officers, who spent very little time at sea, the editors have long been concerned that the Marine Corps was becoming too land-centric, heavily reflecting the characteristics of a second land army. This has been true since 1991, when the Marine Corps participated in a land campaign in Iraq, and especially since 2001, when it participated in three land campaigns: Afghanistan, Iraq, and Syria. To fight these battles, the Marine Corps became heavier, upgraded equipment, and generally focused on counterinsurgency
