The book addresses all three layers of portfolio, program, and project within an integrated governance framework, and it answers the fundamental questions everyone involved in 3P governance must address: What governance structures (processes, functions, roles, responsibilities) need to be in place to ensure optimal portfolio investment outcomes? How do I know our portfolios, as structured, will deliver expected benefits and value? What should senior management be doing, acting in their portfolio governance roles, to deliver great portfolio outcomes? The book introduces and describes a number of important frameworks and models, designed not just for their practical application, but also to be easily comprehended by senior executives not comfortable with traditional 'project speak'.
