It may be applied by brush, roll or spray.

When the J. Paul Getty Museum received twenty-eight sculptures created by a who's who of twentieth-century artists, it took on the responsibility for their preservation, interpretation, and long-term stewardship. Donated from the private collection of the late film producer Ray Stark and his wife, Fran, the sculptures thrust the Getty into the evolving field of outdoor sculpture conservation. To honour its responsibility, the Museum embarked on new research into the collection's materials-bronze, lead, ceramic, and painted metal-and construction techniques. This book presents the conservators' comprehensive account of the process. Chapters are organized around phases of the project rather than individual sculptures and address key issues facing anyone charged with caring for works of art displayed outdoors, including: organization and planning; installation and grounds management; scientific analyses; collaborating with artists; structural issues; mounts, paint, coatings, and patinas; and long-term maintenance.

Publisher's Note: Products purchased from Third Party sellers are not guaranteed by the publisher for quality, authenticity, or access to any online entitlements included with the product. Get up-to-date information on every aspect of aircraft maintenance and prepare for the FAA A&P certification exam This trusted textbook covers all of the airframe maintenance and repair topics that students must understand in order to achieve Airframe and Powerplant (A&P) certification as set forth by the FAA's FAR 147 curriculum. Fully updated for the latest standards and technologies, the book offers detailed discussions of key topics, including structures and coverings, sheet metal and welding, assemblies, landing gear, and fuel systems. Relevant FAA regulations and safety requirements are highlighted throughout. You will get hundreds of illustrations, end-of-chapter review questions, and multiple-choice practice exam questions. New content reflects the industry-wide shift toward all-composite aircraft models and includes explanations of cutting-edge covering systems, modern welding techniques, methods and tools for riveting and rigging, fire detection, and de-icing systems. Aircraft Maintenance & Repair, Eighth Edition, covers: •Hazardous materials•Structures•Fabric•Painting•Welding equipment•Welding and repair•Sheet-metal construction, inspection, and repair•Plastics and composites•Assembly and rigging•Fluid power•Aircraft landing-gear and fuel systems•Environmental and auxiliary systems•Troubleshooting

Describes some 1,500 currently available prepaint specialties and surface tolerant coatings, based on information received from 67 manufacturers and distributors of these products. For each product, lists, as available, company name and product category; trade name and product number; and product description including specifications, properties, and applications. Products are presented by company, and the companies are listed alphabetically. Annotation copyrighted by Book News, Inc., Portland, OR
