Get Better Results with high quality content, exercise sets, and step-by-step pedagogy! Tyler Wallace continues to offer an enlightened approach grounded in the fundamentals of classroom experience in Beginning and Intermediate Algebra. The text reflects the compassion and insight of its experienced author with features developed to address the specific needs of developmental level students. Throughout the text, the author communicates to students the very points their instructors are likely to make during lecture, and this helps to reinforce the concepts and provide instruction that leads students to mastery and success. The exercises, along with the number of practice problems and group activities available, permit instructors to choose from a wealth of problems, allowing ample opportunity for

students to practice what they learn in lecture to hone their skills. In this way, the book perfectly complements any learning platform, whether traditional lecture or distance-learning; its instruction is so reflective of what comes from lecture, that students will feel as comfortable outside of class as they do inside class with their instructor.

The Rockswold/Krieger algebra series fosters conceptual understanding by using relevant applications and visualization to show students why math matters. It answers the common question, "When will I ever use this?" Rockswold teaches students the math in context, rather than including the applications at the end of the presentation. By seamlessly integrating meaningful applications that include real data and supporting visuals (graphs, tables, charts, colors, and diagrams), students are able to see how math impacts their lives as they learn the concepts. The authors believe this approach deepens conceptual understanding and better prepares students for future math courses and life. The new All-in-One Developmental Mathematics program offers everything needed to teach Prealgebra, Beginning Algebra, and Intermediate Algebra in one easy-to-use solution. The program includes a complete MyMathLab course with full eText (one Integrated Course Sequence MyMathLab code for all three courses!) and two print-on-demand options: Complete All-in-One textbook with all chapters, or customized text with selected chapters, in an À la Carte format Worksheets with all chapters or customized with selected chapters Instructors can set it up in two easy steps: 1.) Create the MyMathLab course, and 2.) Choose the print option!

These worksheets provide extra practice exercise for every section of the text with ample space for students to show their work on the practice exercises and Math Coach problems.
