While there is growing interest in IFRS within the US, interest outside the US has exploded. Weygandt's fourth edition of Financial Accounting: IFRS highlights the integration of more US GAAP rules, a desired feature as more foreign companies find the United States to be their largest market. The highly anticipated new edition retains each of the key features (e.g. TOC, writing style, pedagogy, robust EOC) on which users of Weygandt Financial have come to rely, while putting the focus on international companies/examples, discussing financial accounting principles and procedures within the context of IFRS, and providing EOC exercises and problems that present students with foreign currency examples instead of solely U.S. dollars.

This extensively revised, fully updated, third edition includes a wide range of topics with a view to examining the increased challenges that will be faced by academicians, accounting and management professionals in the globally converging dynamic environment of accounting standards. The book is primarily intended as a text for postgraduate students of management (MBA) specializing in accounting and finance, postgraduate students of commerce (M.Com), financial studies, and international business (MIB). In addition, this text will be useful for professional courses offered by institutes such as the Institute of Chartered Accountants (ICAI), the Institute of Cost and Works Accountants (ICWA) and the Institute of Chartered Financial Analysts (ICFPA). **DISTINCTIVE FEATURES** • The text is supported by numerous problems and case studies. • Comparative financial practices in selected countries examined. • The impact of global convergence of accounting practices on MNCs, accounting and finance professionals and academicians has been dealt with in a separate chapter. • Problems of transfer pricing for tangibles, intangibles, services and cost sharing arrangements have been analyzed in detail. • Harmful global tax practices such as tax havens, preferential tax regimes and double tax avoidance conventions have been accorded detailed coverage. • The knotty problems of foreign currency translations, international financial reporting and disclosure, Consolidated Financial Statements and performance evaluation of multinational firms are treated in separate chapters.

Applying International Financial Reporting Standards 3rd edition has been thoroughly updated to reflect the numerous changes with the International Financial Reporting Standards (IFRS) as a consequence of the convergence program between the IASB and FASB. The expert, authoritative and reliable explanations of the author team continues and the textbook is widely referenced by both students and academics, and the accounting profession in countries that have adopted international accounting standards. The continuing focus of the third edition is to explain, interpret, analyse and illustrate the financial reporting requirements under IFRS. Each chapter contains numerous illustrative examples that present and explain concepts to ensure users gain a deep understanding of the reporting requirements and procedures, and attain the knowledge expectations of the accounting profession in respect to IFRS. The coverage of accounting standards has been expanded with the inclusion of new or thoroughly revised chapters on IFRS 9 Financial Instruments, IFRS 11 Joint arrangements, IFRS 13 Fair value measurement, IAS 8 Revenue, IAS 24 Related party disclosures, IAS 33 Earnings per share and IAS 41 Agriculture. This textbook has been written for intermediate and advanced courses on financial accounting, at both undergraduate and postgraduate level.

Offering a unique approach in the field, this book presents the principles of accounting from a corporate perspective. This provides readers with a real-world understanding of the concepts.

International Accounting can be viewed in terms of accounting issues uniquely confronted by companies involved in international business. It also can be viewed more broadly as the study of how accounting is practiced in each and every country around the world, learning about and comparing the differences in various accounting methods. This is unique in its content and is up-to-date with relevant material integrated throughout the textbook. In its first year, this text captured approximately 30 percent of the market.

In addition to these short summaries, each chapter contains a case study that stresses the practical application of key concepts in a particular standard. This provides the non-technical reader with the tools to participate in discussions on the appropriateness and application of a standard to a given situation. All of the accounting standards, issued by the International Accounting Standards Committee (IASC) are included in this book, as well as interpretations disseminated by the Standards Interpretations Committee (SIC) through 31 December 2003.
