An essential text for the AAT Level 2 Certificate in Accounting (Basic Costing). This text contains practice examinations with answers, helping the student to prepare for the exam.

The easy way to get a grip on cost accounting Critical in supporting strategic business decisions and improving profitability, cost accounting is arguably one of the most important functions in the accounting field. For business students, cost accounting is a required course for those seeking an accounting degree and is a popular elective among other business majors. Cost Accounting For Dummies tracks to a typical cost accounting course and provides in-depth explanations and reviews of the essential concepts you'll encounter in your studies: how to define costs as direct materials, direct labor, fixed overhead, variable overhead, or period costs; how to use allocation methodology to assign costs to products and services; how to evaluate the need for capital expenditures; how to design a budget model that forecast changes in costs based on expected activity levels; and much more. Tracks to a typical cost accounting course Includes practical, real-world examples Walks you through homework problems with detailed, easy-to-understand answers If you're currently enrolled in a cost accounting course, this hands-on, friendly guide gives you everything you need to master this critical aspect of accounting.

An essential text for the AAT Level 3 Diploma in Accounting (Cash Management). This text contains practice examinations with answers, helping the student to prepare for the exam. This revised edition has been updated to include a brand new practice assessment.

Enjoy a breakdown of notes from 'student notes from passed students' this book is intended to breakdown your level 2 accountancy course into easier to understand notes which can aid in making flashcards, tables etc, without having to breakdown and take notes from the books yourselves, no doubt saving you time and stress in revision.

This is a core text in cost and management accounting at introductory and intermediate level. It covers the latest syllabi of a number of accounting examinations including those set by ACAEW, ACCA, CIMA and AAT. It also looks at current developments in the area. Features of the book include:

"The Course Book provides all the knowledge required for the Management Accounting: Budgeting unit. The Course Books cover the relevant syllabus comprehensively, at an appropriate level and in a clear, user-friendly way. Features include: practical examples, tasks to consolidate learning, in-depth syllabus coverage, chapter summaries and keywords. Our materials and online equivalents will help ensure you are ready for your assessments and prepared for your career in accounting. "

A groundbreaking introduction to vectors, matrices, and least squares for engineering applications, offering a wealth of practical examples.
