The TOGAF® Standard, a standard of The Open Group, is a proven Enterprise Architecture methodology and framework used by the world's leading organizations to improve business efficiency. It is the most prominent and reliable Enterprise Architecture standard, ensuring consistent standards, methods, and communication among Enterprise Architecture professionals. Those professionals fluent in the TOGAF approach enjoy greater industry credibility, job effectiveness, and career opportunities. The TOGAF approach helps practitioners avoid being locked into proprietary methods, utilize resources more efficiently and effectively, and realize a greater return on

The Open Group IT4IT(TM) Reference Architecture, Version 2.1, an Open Group Standard, provides a vendor-neutral, technology-agnostic, and industry-agnostic reference architecture for managing the business of IT. The Open Group IT4IT Reference Architecture standard comprises a reference architecture and a value chain-based operating model. The IT Value Chain has four value streams supported by a reference architecture to drive efficiency and agility. The four value streams are: - Strategy to Portfolio - Request to Fulfill - Requirement to Deploy - Detect to Correct. Each IT Value Stream is

# Online Library It4it Foundation Self Study Pack 2nd Edition

centered on a key aspect of the service model, the essential data objects (information model), and functional components (functional model) that support it. Together, the four value streams play a vital role in helping IT control the service model as it advances through its lifecycle. The IT4IT Reference Architecture: - Provides prescriptive guidance on the specification of and interaction with a consistent service model backbone (common data model/context). - Supports real-world use-cases driven by the Digital Economy (e.g., Cloud-sourcing, Agile, DevOps, and service brokering)..- Embraces and complements existing process frameworks and methodologies (e.g., ITIL(R), CoBIT(R), SAFe, and

# Online Library It4it Foundation Self Study Pack 2nd Edition

TOGAF(R)) by taking a data-focused implementation model perspective, essentially specifying an information model across the entire value chain. The audience for this standard is: - IT Professionals who are responsible for delivering services in a way that is flexible, traceable, and cost-effective - IT Professionals / Practitioners who are focused on instrumenting the IT management landscape - IT Leaders who are concerned about their operating model - Enterprise Architects who are responsible for IT business transformation

be ordered by Partners. The Courseware consist out of ArchiMate® 3 Foundation and Practitioner (Level 1 & 2) (ISBN978 94 018 0217 8) This courseware is based on ArchiMate 3.0. The ArchiMate Specification is a modeling language that enables Enterprise Architects to describe, analyze and visualize relationships among architecture domains using easy to understand visuals representations. It provides a common language for describing how various parts of the enterprise are constructed and how they operate, including business processes, organizational structures, information flows, IT systems, and technical and physical infrastructures. In a time when many enterprises are undergoing rapid change,

# Online Library It4it Foundation Self Study Pack 2nd Edition

ArchiMate models help stakeholders design, assess and communicate those changes within and between architecture domains, as well as examine the potential consequences and impact of decisions throughout an organization. A training in ArchiMate will give you knowledge about theoretical and practical aspects of ArchiMate and is useful if you wish to be able to apply this modelling language in practice. The purchase of the exam related to this ArchiMate® courseware is mandatory when purchasing this ArchiMate® courseware. Exam information: When registered for a ArchiMate® course, the exam/certification voucher will be included in the training fee. This only applies to

courses offered by Van Haren Publishing or its affiliates.

ArchiMate®, an Open Group Standard, is an open and independent modelling language for Enterprise Architecture that is supported by different tool vendors and consulting firms. ArchiMate provides instruments to enable enterprise architects to describe, analyze, and visualize the relationships among business domains in an unambiguous way. This book provides the official specification of ArchiMate 2.1 from The Open Group. ArchiMate 2.1 is a maintenance update to ArchiMate 2.0, addressing comments raised since the introduction of ArchiMate

2.0 in 2012. The ArchiMate 2.1 Standard supports modelling throughout the TOGAF® Architecture Development Method (ADM). The intended audience is threefold: Enterprise Architecture practitioners, such as architects (e.g. application, information, process, infrastructure, and, obviously, enterprise architects), senior and operational management, project leaders, and anyone committed to work within the reference framework defined by the Enterprise Architecture. Those who intend to implement ArchiMate in a software tool; they will find a complete and detailed description of the language in this book. The academic community, on which we rely for amending and improving the language, based on state-of-the-art
