Covert Rural Surveillance is the definitive tradecraft manual dedicated to modern military techniques and covert tactics for rural surveillance operations. With over 560 pages, in excess of 1500 colour images and diagrams, it offers unrivalled insight and quality to this unique subject.

The book is a reference and practice book for elementary learners.

Fry The Brain is a detailed, original study of urban guerrilla sniping and its employment in modern unconventional warfare. Fry The Brain strives to educate the interested reader in all aspects of modern urban guerrilla sniping. As such, Fry The Brain is a unique, relevant work that is a must read for all students of contemporary guerrilla warfare.

Made to Break is a history of twentieth-century technology as seen through the prism of obsolescence. Giles Slade explains how disposability was a necessary condition for America's rejection of tradition and our acceptance of change and impermanence. This book gives us a detailed and harrowing picture of how, by choosing to support ever-shorter product lives, we may well be shortening the future of our way of life as well.

"If I only bought one woodwork book, this first and definitive book on the workbench would be it".--"Woodworker Magazine". 278 color photos. 185 drawings.

Latent Inhibition and Its Neural Substrates describes a neural network model of attentional processes during associative learning, mainly latent inhibition, and shows how variables in the model can be mapped onto different brain regions and neurotransmitters. The result is a neurophysiological model capable of generating predictions and descriptions of numerous experimental results using latent inhibition, including the effects of brain lesions, drug administration, and the combination of both. The model also explains the absence of latent inhibition in acute schizophrenia and its reinstatement by the administration of psychotropic drugs.

Fifty everyday objects, from an SLR camera to an espresso machine, appear as though they've been exploded and frozen in midair, offering an intricate, piece-piece overview of the inner workings and elegance of each object's design. 20,000 first printing.

This book is the first practical, hands-on guide that shows how leaders can build psychological safety in their organizations, creating an environment where employees feel included, fully engaged, and encouraged to contribute their best efforts and ideas. Perhaps the leader's most challenging task is to increase intellectual friction while decreasing social friction. When this doesn't happen and it becomes emotionally expensive to say what you truly think and feel, that lack of psychological safety triggers the self-censoring instinct, shuts down learning, and blocks collaboration and creativity. Timothy R. Clark, a former CEO, Oxford-trained social scientist, and organizational consultant, provides a research-based framework to help leaders transform their organizations into sanctuaries of inclusion and incubators of innovation. When leaders cultivate psychological safety, teams and organizations progress through four successive stages. First, people feel included and accepted; then they feel safe to learn, contribute, and finally, challenge the status quo. Clark draws deeply on psychology, philosophy, social science, literature, and his own experiences to show how leaders can, and must, set the tone and model the ideal behaviors:as he says, iyou either show the way or get in the way. This thoughtful and pragmatic guide demonstrates that if you banish fear, install true performance-based accountability, and create a nurturing environment that allows people to be vulnerable as they learn and grow, they will perform beyond your expectations.

In this jam-packed and revised edition, readers will learn how to recognize types of lawns, maintain excellent care, and diagnose and cure lawn troubles. The lawn care program and calendar continue to be reader favorites. Full-color illustrations.
