Ageing and Memory are two cultural processes that establish their own relationships with time. They affect our ways of living, in the present, and for a future, as we move through life. This book focuses on the cultural mediations of ageing and memory, teasing out their complex and largely unpredictable relationships and interconnections. Its overall purpose is to explore different practices, commodities, daily routines, sounds, images and technologies that configure memory and ageing and shape our experiences of living in time and with time. By covering a variety of phenomena, from biopics, music by elderly, and artefacts among other, this edited collection considers the cultural stuff that ageing and memory are made of and interconnected in singular ways, for and by particular people, in specific socio-historical locations.

Merrill Education invites you to rediscover "Teaching Secondary School Science: Strategies for Developing Scientific Literacy, " Eighth Edition. Still reflecting the latest in learning theory, inquiry, and professional development, this text has new pedagogy that makes it even easier for students to incorporate the hands-on, practical activities and exercises in their own classrooms. Unique Features: Engage your students with Teaching Science Activity features, "Investigating Science Teaching, Engaging in Action Research, " and "Experiencing Ethical Analysis." Located at the ends of the chapters, they provide an opportunity for students to experience science for themselves. Icons highlight new integrated technology resources. Discussions of technology have been updated and woven throughout the text, including Technology margin notes that encourage students to visit the text's website at www.prenhall.com/trowbridge for further research and supplemental science activities. "Guest Editorials" showcase real preservice and inservice science teachers. These editorials appear throughout the text to help illustrate concepts and provide real-world context for students.
