corn planter for sale in New York Classifieds & Buy and ...

Friend has purchased a 1981 John Deere 7000 6 row 30" planter with automatic markers. One side will let down the other will not. We took out the actuator. The big spring is broke, but looks functional. We guess the spring is just a cushion spring. Looks like to us that the two flat metal pieces in beside the hyd. cylinder is the problem.

The Organic Grain Grower is an invaluable resource for both home-scale and commercial producers interested in expanding their resiliency and crop diversity through growing their own grains. Longtime farmer and organic pioneer Jack Lazor covers how to grow and store wheat, barley, oats, corn, dry beans, soybeans, oilseeds, grasses, nutrient-dense forages, and lesser-known cereals. In addition, Lazor argues the importance of integrating grains on the organic farm (not to mention within the local food system) for reasons of biodiversity and whole-farm management. The Organic Grain Grower provides information on wide-ranging topics, from nutrient density and building soil fertility to machinery and grinding grains for livestock rations.--COVER.

Take a journey back in time as we recount the history of Huntington County, Indiana from 1834 - 1993. This comprehensive history makes the past come alive with hundreds of never before published photographs and nearly 1,000 family biographies. This will be a treasured volume for anyone with a link to this county.

Now is a time of exciting new developments for live animal power. As the numbers of adherents to this way of life grow, ecologically minded farmers in their fields are developing efficient horse-drawn systems, and equipment manufacturers in small shops all across North America and Europe are coming forth with new innovations in ground-drive technology that have us poised on the cusp of another agricultural revolution—with working horses, mules, donkeys, and oxen at the heart of it. --Publisher

The story of how an Iowa farmer-inventor fought the industry giants and created one of the largest private farm equipment manufacturers in the world

Written for farmers who are thinking about changing their farm management from a more conventional farming system to a sustainable, reduced-input farming system, and for agri-professionals who assist them. Written for Minnesota farmers, but has wide applicability to all regions. Many specific examples of successful adaption to sustainable farming.
