This open access book analyses intellectual property and innovation governance in the development of six key industries in India and China. These industries are reflective of the innovation and economic development of the two economies, or of vital importance to them: the IT Industry, the film industry, the pharmaceutical industry, plant varieties and food security, the automobile industry, and the sharing economy. The analysis extends beyond the domain of IP law, and includes economics and policy analysis. The overarching concerns of the book are how the examined industries have developed in the two countries, what role state innovation policy and/or IP policy has played in such development, what the nature of the state innovation policy/IP policy is, whether such policy has been causal, facilitating, crippling, co-relational, or simply irrelevant, and whether there is a possibility of synergy between the two economies. The book also inquires as to why and how one specific industry has developed in one country and not in the other, and what India and China can learn from each other. The book provides a real-life understanding of how IP laws interact with innovation and economic development in the six selected economic sectors in China and India. The reader can also draw lessons from the success or failure of these sectors. --

Today, consumer credit, employee stock options, and citizen investment in the stock market are taken for granted--fundamental facts of American economic life. But few people realize that they were first widely promoted by John Jakob Raskob (1879-1950), the innovative financier and self-made businessman who built the Empire State building, made millions for DuPont and General Motors, and helped shape the contours of modern capitalism. David Farber's Everybody Ought to Be Rich is the first biography of Raskob, a man who shunned the limelight (he was the anti-Trump of his time) but whose impact on free market enterprise can hardly be overstated. A colorful figure, Raskob's life evokes the roaring twenties, the Catholic elite, the boardrooms of America's biggest corporations, and the rags-to-riches tale that is central to the American dream. Farber follows Raskob's remarkable trajectory from a teenage candy seller on the railway between Lockport and Buffalo to the pinnacles of wealth and power. With no formal education but possessed of a boundless energy and an unshakeable faith in individual initiative (his motto was "Go ahead and do something!"), Raskob partnered with great industrialists and financiers, buying up companies, leveraging investments, reorganizing corporations, funneling money into the political system, and creating new pools of credit for rich investors and middle class consumers alike--practices commonplace today but revolutionary at the time. His most famous innovation was mass consumer credit, which he offered to individual car buyers, enabling working and middle-class Americans to purchase GM's more expensive cars. Raskob desperately wanted to bridge class divides and to share the wealth American corporations were fast creating--so that everyone could be rich. Chronicling Raskob's short-comings as well as his successes, Everybody Ought to Be Rich illuminates a crucial but little-known figure in American capitalism whose influence can still be felt today.
