This collection offers the first detailed investigation of political life in nineteenth-century London. London politics did not share the free-trade and civil-equality preoccupations of the provinces which currently dominate scholarly literature. As these essays reveal, the capital remained more concerned with older struggles for political independence. By highlighting the inability of existing accounts to accommodate metropolitan distinctiveness, the collection aims to stimulate a major reappraisal not of London politics alone, but of Victorian political history more generally.

First published in 1987, this is a comprehensive analysis of the rise of the British Press in the eighteenth century, as a component of the understanding of eighteenth century political and social history. Professor Black considers the reasons for the growth of the "print culture" and the relations of newspapers to magazines and pamphlets; the mechanics of circulation; and chronological developments. Extensively illustrated with quotations from newspapers of
