Concern with the symbolic dimension of representation and consciousness, which Jung identified and emphasised in his model of development, is also accentuated and articulated in postmodern praxis (though with Jung this is organised vis'a'vis aspects of his theory which are both structuralist and pre-modern in origin and in postmodern philosophy the concern is less with the psychological dimension and psyche as to the semiotics embedded in and at play say texts or artefacts of cultural ...

The term ‘ post-Jungian ’ that I introduced (in 1985) in my book ‘ Jung and the Post-Jungians ’ serves as a useful heuristic indicator of what I have in mind. What has Jung to do with the Postmodern? Chris Hauke's lively and provocative book, puts the case that Jung's psychology constitutes a critique of modernity that brings it in line with many aspects of the postmodern critique of contemporary culture. The metaphor he uses is one in which 'we are gazing through a Jungian transparency or filter being held up against the postmodern while, from the other side, we are also able to look through a transparency or filter of the postmodern to gaze at Jung. From either direction there will be a new and surprising vision.' Setting Jung against a range of postmodern thinkers, Hauke recontextualizes Jung's thought as a reponse to modernity, placing it - sometimes in parallel and sometimes in contrast to - various postmodern discourses. chapters on themes such as meaning, knowledge and power, the contribution of architectural criticism to the postmodern debate, Nietzsche's perspective theory of affect and Jung's complex theory, representation and symbolization, constructivism and pluralism, this is a book which will find a ready audience in academy and profession alike.

Jung, Psychology, Postmodernity explores points of confluence and, more often, contradictions between Jungian and postmodern ideas. Throughout the book Raya Jones examines how personal meaning emerges in human activity. Jung addressed this in terms of symbol formation, with particular attention to dreams, myths, art and other fantasy productions. Postmodern psychologists tend to address issues of meaning in terms of peoples self-understanding and identity construction, with a focus on self-positioning in actual conversation or on autobiographical narratives. Jones draws a line of critical comparison between postmodern psychology and Jung ' s descriptions of the symbolic dimension, myth, and the structure of the psyche. The book culminates with an evaluation of Jung ' s psychic energy concept, for which there is no direct counterpart in postmodern psychology. Jung, Psychology, Postmodernity is an original critique of two key moments in the history of psychology. It will be welcomed by Jungians, as well as psychotherapists, and students of psychology.

C. G. Jung has been and continues to be a pervasive yet often unacknowledged presence in twentieth-century art and intellectual life. This timely volume is the first comprehensive attempt to assess this presence and to demonstrate Jung's far-reaching cultural impact. The distinguished contributors represent a number of views, from traditional Jungian to the most contemporary post-Jungian stances, including feminist, non-Jungian, and anti-Jungian positions. Jung, as seen in this volume, addresses a wide range of contemporary issues related to creativity, gender, religion, popular culture, and hermeneutics. The essays reveal dimensions of his work that extend far beyond psychoanalytical theory and that show his hermeneutics to be a much more subtle and sophisticated methodology than previously allowed by his critics. This methodology appears, in fact, to have anticipated significant aspects of contemporary critical principles and practice. The contributors to the volume were among the participants in a major international conference sponsored by Hofstra University and the C. G. Jung Foundation of New York, held in 1986 at Hofstra University. They include Thomas Belmonte, Robert Bly, Joseph Campbell, Edward S. Casey, Stanley Diamond, Jean Erdman, Leslie Fiedler, James Hillman, Paul Kugler, Ibram Lassaw, Neil Levine, David L. Miller, Lucio Pozzi, Gilles Quispel, Robert Richenburg, Carol Schreier Rupprecht, Andrew Samuels, Harold Schechter, and June Singer. Originally published in 1990. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

The spiritual malaise regnant in today ' s disenchanted world presents a picture of " a polar night of icy darkness, " as Max Weber wrote already a century ago. This collective dark night of the soul is driven by climate change-related disasters, rapid technological innovations, and opaque geostrategic realignments. In the wake of what policy analysts refer to as " Westlessness, " the postmodern age is characterized by incessant distractions, urgent calls to responsibility, and in-humanly short deadlines, which result in a general state of exhaustion and burnout. The hovering sense of living in a time frame that is post-histoire induces states of confusion on a personal level as well as in the realm of politics. Totally missing is a grand narrative to guide humanity ' s vision in the midst of a world crisis. Thinkers, scholars, and Jungian analysts are increasingly looking to C.G. Jung ' s monumental oeuvre, The Red Book, as a source for guidance to re-enchant the world and to find a new and deeper understanding of the homo religiosus. The essays in this series on Jung ' s Red Book for Our Time: Searching for Soul under Postmodern Conditions circle around this objective and offer countless points of entry into this inspiring work.

This book focuses on some of the main aspects and importance of The Red Book for the understanding of the work of C.G. Jung. It sheds light on the great mysteries of human nature and the new dimension uncovered by Jung and Freud: the universe of the unconscious and the possible ways to approach it.

Ever since the shocking revelations of the fascist ties of Martin Heidegger and Paul de Man, postmodernism has been haunted by the specter of a compromised past. In this intellectual genealogy of the postmodern spirit, Richard Wolin shows that postmodernism ' s infatuation with fascism has been extensive and widespread. He questions postmodernism ' s claim to have inherited the mantle of the Left, suggesting instead that it has long been enamored with the opposite end of the political spectrum. Wolin reveals how, during in the 1930s, C. G. Jung, Hans-Georg Gadamer, Georges Bataille, and Maurice Blanchot were seduced by fascism's promise of political regeneration and how this misapprehension affected the intellectual core of their work. The result is a compelling and unsettling reinterpretation of the history of modern thought. In a new preface, Wolin revisits this illiberal intellectual lineage in light of the contemporary resurgence of political authoritarianism.

Jung: A Feminist Revision explores the relationship between feminist theory and Jungian studies. It combines an original student-friendly introduction to Jung, his life and work, his treatment of gender and the range of post-Jungian gender theory, with new research linking Jung to deconstruction, post-Freudian feminism, postmodernism, the sublime, and the postmodern body. Feminism has neglected Jung to its own detriment. While evaluating the reasons for this neglect, Jung: A Feminist Revision uses the diversity of feminist critical tools from historical analysis to poststructuralism. In a fresh and illuminating study, this book provides both a critique of Jung and demonstrates his positive potential for future feminisms. New theories are explored which develop relationships between the work of Jung and Jacques Lacan, Luce Irigaray, Hélène Cixous, Julia Kristeva and Judith Butler. Particular attention is paid to the growth of post-Jungian studies of gender. This includes a cogent study of the tradition of Jungian feminism that looks to the feminine principle and narratives of goddesses. Jungian goddess feminism ' s enduring appeal is re-examined in the context of postmodern re-thinking of subjectivity and gender. The book proposes a re-orientation of Jungian studies in its relationship to feminism. The result is an accessible text that introduces Jung and sets out his relevance to contemporary feminisms. This book will be essential reading for undergraduates and postgraduates studying feminist theory, psychoanalytical theory, literature and psychology.

Why is the moving image so important in our lives? What is the link between the psychology of Jung, Freud and films? How do film and psychology address the problems of modernity? Visible Mind is a book about why film is so important to contemporary life, how film affects us psychologically as individuals, and how it affects us culturally as collective social beings. Since its inception, film has been

both responsive to historical cultural conditions and reflective of changes in psychological and emotional needs. Arising at the same moment over a century ago, both film and psychoanalysis helped to frame the fragmented experience of modern life in a way that is still with us today. *Visible Mind* pays attention to the historical context of film for what it can tell us about our inner lives, past and present. Christopher Hauke discusses a range of themes from the perspective of film and analytical psychology, these include: The Face, The Shadow, Narrative and Story, Reality in Film, Cinema and the American Psyche, the use of Movies in the Psychotherapy Session and Archetypal themes in popular film. Unique to *Visible Mind*, six interviews with top film professionals from different departments both unlocks the door on the role of the unconscious in their creative process, and brings alive the reflexive critical thinking on modernity, postmodernity and Jungian psychology found throughout *Visible Mind*. *Visible Mind* is written for academics, filmmakers and students who want to understand what Jung and Freud's psychology can offer on the subject of filmmaking and the creative process, for therapists of any background who want to know more about the significance of movies in their work and for film lovers in general who are curious about what makes movies work.

Until now, the single most important unpublished work by C.G. Jung—*The Black Books*. In 1913, C.G. Jung started a unique self- experiment that he called his “ confrontation with the unconscious ” : an engagement with his fantasies in a waking state, which he charted in a series of notebooks referred to as *The Black Books*. These intimate writings shed light on the further elaboration of Jung ’ s personal cosmology and his attempts to embody insights from his self- investigation into his life and personal relationships. *The Red Book* drew on material recorded from 1913 to 1916, but Jung actively kept the notebooks for many more decades. Presented in a magnificent, seven-volume boxed collection featuring a revelatory essay by noted Jung scholar Sonu Shamdasani—illuminated by a selection of Jung ’ s vibrant visual works—and both translated and facsimile versions of each notebook, *The Black Books* offer a unique portal into Jung ’ s mind and the origins of analytical psychology.
