generation to become adept in communication and more so in technical communication. This comprehensive book on Basic Technical Communication strives to focus on the communication skills needed by professionals. One of the major aims of this text is to enable students to acquire proficiency in the English language. Divided into five parts and 19 chapters, the text deals with the four essential ingredients of communication—reading, writing, listening and speaking skills—as well as their importance, objectives, types, and methods of improving these skills. The book also discusses how these skills can be effectively applied and provides considerable practice exercises. **KEY FEATURES :** The text is logically organized with adequate practice in each part. Gives emphasis on grammar and pronunciation.
