Kafka on the Shore displays one of the world’s great storytellers at the peak of his powers. Here we meet a teenage boy, Kafka Tamura, who is on the run, and Nakata, an aging simpleton who is drawn to Kafka for reasons that he cannot fathom. As their paths converge, acclaimed author Haruki Murakami enfolds readers in a world where cats talk, fish fall from the sky, and spirits slip out of their bodies to make love or commit murder, in what is a truly remarkable journey.

Vintage Readers are a perfect introduction to some of the greatest modern writers presented in attractive, accessible paperback editions. “Murakami’s bold willingness to go straight over the top is a signal indication of his genius. . . . A world-class writer who has both eyes open and takes big risks.” —The Washington Post Book World Not since Yukio Mishima and Yasunari Kawabata has a Japanese writer won the international acclaim enjoyed by Haruki Murakami. His genre-busting novels, short stories and reportage, which have been translated into 35 languages, meld the surreal and the hard-boiled, deadpan comedy and delicate introspection. Vintage Murakami includes the opening chapter of the international bestseller Norwegian Wood; “Lieutenant Mamiya’s Long Story: Parts I and II” from his monumental novel The Wind-Up Bird Chronicle; “Shizuko Akashi” from Underground, his non-fiction book on the Toyko subway attack of 1995; and the short stories “Barn Burning,” “Honeypie.” Also included, for the first time in book form, the short story, “Ice Man.”

By challenging many of the assumptions, misguided presuppositions and even legends that have surrounded the legacy and reception of Franz Kafka's work during the 20th century, Howard Caygill provides us with a radical new way of reading Kafka. *Kafka: In the Light of the Accident* advances a unique philosophical interpretation via the pivotal theme of the accident, understood both philosophically and in a broader cultural context, that includes the philosophical and sociological basis of accident insurance and the understanding of the concepts of chance and necessity. Caygill reveals how Kafka's reception was governed by a series of accidents - from the order of Max Brod's posthumous publication of the novels and the correction of 'misprints', to many other posthumous editorial strategies. The focus on the accident casts light on the role of media in Kafka's work, particularly visual media and above all photography. By stressing the role of contingency in his authorship, Caygill also fundamentally questions the 20th century view of Kafka's work as 'kafkaesque'. Instead of a narration of domination, *Kafka: In the Light of the Accident* argues that Kafka's work is best read as a narration of defiance, one which affirms (often comically) the role of error and contingency in historical struggle. Kafka's defiance is situated within early 20th century radical culture, with particular emphasis lent to the roles of radical Judaism, the European socialist and feminist movements, and the subaltern histories of the United States and China.

Through the examination of anti-psychiatric theory and literary texts, this timely and thought-provoking volume explores the possibilities of liberating our habitual patterns of perception and consciousness beyond the confines of a capitalist era. In *Post-Capitalist Subjectivity in Literature and Anti-Psychiatry*, Skott-Myhre asks the question, how might we be different if we didn't live in a capitalist society? By drawing on Marxist and post-Marxist theory, and conducting nuanced analysis of the professional writings of anti-psychiatrists including Basaglia and Laing, and the work of fiction writers Kafka and García Márquez, the text identifies alternative conceptualizations of the self. Focusing in particular on portrayals of institutions and the family, Skott-Myhre proposes that these social systems offer new modes of reading the world and ourselves which will transform social organization and free subjectivity from dominant capitalist structures. This transdisciplinary text responds to a revitalized interest in alternatives to traditional psychology, an interest in life beyond capitalism, and the crisis in the traditional family. *Post-Capitalist Subjectivity in Literature and Anti-Psychiatry* will offer timely reading for graduate students, researchers, and scholars in the fields of cultural studies, psychology, philosophy, family studies, and interdisciplinary studies.

Philosophy and Kafka is a collection of original essays interrogating the relationship of literature and philosophy. The essays either discuss specific philosophical commentaries on Kafka's work, consider the possible relevance of certain philosophical outlooks for examining Kafka's writings, or examine Kafka's writings in terms of a specific philosophical theme, such as communication and subjectivity, language and meaning, knowledge and truth, the human/animal divide, justice, and freedom.

The field of socio-legal research has encountered three fundamental challenges over the last three decades – it has been criticized for paying insufficient attention to legal doctrine, for failing to develop a sound theoretical foundation and for not keeping pace with the effects of the increasing globalization and internationalization of law, state and society. This book examines these three challenges from a methodological standpoint. It addresses the first two by demonstrating that legal sociology has much to say about justice as a kind of social experience and has always engaged theoretically with forms of normativity, albeit on its own empirical terms rather than on legal theory's analytical terms. The book then explores the third challenge, a result of the changing nature of society, by highlighting the move from the industrial relations of early modernity to the post-industrial conditions of late modernity, an age dominated by information technology. It poses the question whether socio-legal research has sufficiently reassessed its own theoretical premises regarding the relationship between law, state and society, so as to grasp the new social and cultural forms of organization specific to the twenty-first century's global societies.

South of the Border, West of the Sun is the beguiling story of a past rekindled, and one of Haruki Murakami's most touching novels. Hajime has arrived at middle age with a loving family and an enviable career, yet he feels incomplete. When a childhood friend, now a beautiful woman, shows up with a secret from which she is unable to escape, the fault lines of doubt in Hajime's quotidian existence begin to give way. Rich, mysterious, and quietly dazzling, in *South of the Border, West of the Sun* the simple arc of one man's life becomes the exquisite literary terrain of Murakami's remarkable genius.

In the Penal Colony is a short story by Franz Kafka written in German in October 1914, revised in November 1918, and first published in October 1919. The story is set in an unnamed penal colony. Internal clues and the setting on an island suggest Octave Mirbeau's *The Torture Garden* as an influence. As in

some of Kafka's other writings, the narrator in this story seems detached from, or perhaps numbed by, events that one would normally expect to be registered with horror. "In the Penal Colony" describes the last use of an elaborate torture and execution device that carves the sentence of the condemned prisoner on his skin before letting him die, all in the course of twelve hours. As the plot unfolds, the reader learns more and more about the machine, including its origin and original justification. The story focuses on the Explorer, who is encountering the brutal machine for the first time. Everything about the machine and its purpose is told to him by the Officer. The Soldier and the Condemned (who is unaware that he has been sentenced to die) placidly watch from nearby. The Officer tells of the religious epiphany the executed experience in their last six hours in the machine. Eventually, it becomes clear that the use of the machine and its associated process of justice – the accused is always instantly found guilty, and the law he has broken is inscribed on his body as he slowly dies over a period of 12 hours – has fallen out of favor with the current Commandant. The Officer is nostalgic regarding the torture machine and the values that were initially associated with it. As the last proponent of the machine, he strongly believes in its form of justice and the infallibility of the previous Commandant, who designed and built the device. In fact, the Officer carries its blueprints with him and is the only person who can properly decipher them; no one else is allowed to handle these documents.

Reset in South Africa as apartheid is coming undone, "Kafka's Curse" is a brilliantly conceived and powerfully evoked retelling of the Arabic legend of the gardener who dares to love a princess and, for his transgression, is transformed into a tree.
