regions. You should color in these regions with the same shade of green. In the middle of the abdomen is the umbilical region. Color this region in red. Above this is the epigastric region (epi= above and gastric= stomach). Color this region in purple. Below the umbilical region is the hypogastric region (hypo = below). Color this region in a darker blue.

Chapter One: Introduction - a stephens science

California State University, Northridge

California State University, Northridge

The cardiovascular system is sometimes called, simply, the circulatory system. It consists of the heart, which is a muscular pumping device, and a closed system of vessels called arteries, veins, and capillaries. As the name implies, blood contained in the circulatory system is pumped by the heart around a closed circle or circuit of vessels as it

More people get into medical school with a Kaplan MCAT course than all major courses combined. Now the same results are available with MCAT Biology Review. This book features thorough subject review, more questions than any competitor, and the highest-yield questions available. The commentary and instruction come directly from Kaplan MCAT experts and include targeted focus on the most-tested concepts. MCAT Biology Review offers: **UNPARALLELED MCAT KNOWLEDGE:** The Kaplan MCAT team has spent years studying every MCAT-related document available. In conjunction with our expert psychometricians, the Kaplan team is able to ensure the accuracy and realism of our practice materials. **THOROUGH SUBJECT REVIEW:** Written by top-rated, award-winning Kaplan instructors, all material has been vetted by editors with advanced science degrees and by a medical doctor. **EXPANDED CONTENT THROUGHOUT:** As the MCAT has continued to develop, this book has been updated continuously to match the AAMC's guidelines precisely—no more worrying if your prep is comprehensive! **“STAR RATINGS” FOR EVERY SUBJECT:** New for the 3rd Edition of MCAT Biology Review, every topic in every chapter is assigned a “star rating”—informed by Kaplan's decades of MCAT experience and facts straight from the testmaker—of how important it will be to your score on the real exam. **MORE PRACTICE THAN THE COMPETITION:** With 350+ questions throughout the book and access to a full-length practice test, MCAT Biology Review has more practice than any other MCAT biology book on the market. **ONLINE COMPANION:** One practice test and additional online resources help augment content studying. The MCAT is a computer-based test, so practicing in the same format as Test Day is key. **TOP-QUALITY IMAGES:** With full-color, 3-D illustrations, charts, graphs and diagrams from the pages of Scientific American, MCAT Biology Review turns even the most intangible, complex science into easy-to-visualize concepts. **KAPLAN'S MCAT REPUTATION:** Kaplan is a leader in the MCAT prep market, and twice as many doctors prepared for the MCAT with Kaplan than with any other course.* **UTILITY:** Can be used alone or with the other companion books in Kaplan's MCAT Review series. * Doctors refers to US MDs who were licensed between 2001-2010 and used a fee-based course to prepare for the MCAT. The AlphaDetail, Inc. online study for Kaplan was conducted between Nov. 10 - Dec. 9, 2010 among 763 US licensed MDs, of whom 462 took the MCAT and used a fee-based course to prepare for it.

A Brandon/Hill Medical List suggested initial purchase. This is the "digital edition" of the 11th edition of this classic work, which means the book comes with a subscription to the online site (good for the life of the edition) giving access to the complete text, an image library, updates, links, and customization features as well as PDA download

An Easier and Better Way to Learn Anatomy. The Anatomy Coloring Workbook, 4th Edition uses the act of coloring to provide you with a clear and concise understanding of anatomy. This interactive approach takes less time than rote memorization, and thoroughly fixes anatomical concepts in your mind for easier visual recall later. An invaluable resource for students of anatomy, physiology, biology, psychology, nursing & nutrition, medicine, fitness education, art, and more, the Anatomy Coloring Workbook includes: - 126 coloring plates with precise, easy-to-follow renderings of anatomical structures - Comprehensive explanations of the pictured structures and anatomical concepts - An introductory section on terminology to get you started and coloring suggestions to assist you - A glossary of common anatomical terms for quick reference - New injury & ailment appendices, with additional memorization techniques The includes the following sections: - Introduction to Anatomy - The Integumentary System - The Skeletal System - The Muscular System - The Nervous System - The Endocrine System - The Circulatory System - The Lymphatic System - The Digestive System - The Respiratory System - The Urinary System - The Reproductive System
