(Separately I have a load of Autocom connections and cabling I am also selling as well as an Autocom unit with walkie talkie cable ...

Four WWII combatants travel to a distant and dangerous future in this novel by “two of the most revered names from [science fiction ’s] Golden Age” (SFReviews.net). During World War II, four bitter enemies are pulled forward a billion years in time by a master being from an alien galaxy. They arrive on a dying Earth—to Carcasilla, Earth’s last citadel—where the mutated remnants of humanity are making their final stand against the monstrous creations of a fading world. Thrust in the middle of this desperate struggle for survival, the last humans must put aside their differences and stop the looming Armageddon. Praise for Henry Kuttner “One of the all-time major names in science fiction.” —The New York Times “A neglected master.” —Ray Bradbury, author of Fahrenheit 451 “Kuttner is magic.” —Joe R. Lansdale, author of The Thicket

How to Make It Big in the Seminar Business is considered must have reading among consultants, speakers, and seminar leaders. Fully updated and revised, this new edition is packed with insider tips on determining fees, marketing, scheduling, presentation technologies, and much more. It features new chapters on using the Web and other new technologies to deliver seminars; marketing on the Web; developing coaching services in conjunction with seminars; and E-mail newsletters. Readers get a fully updated and expanded directory--listing the names, addresses, and telephone numbers for hundreds of public seminar companies, corporate training companies, speakers bureaus, and seminar websites.

This chilling, futuristic novel, written in 1913 and first published the following year, was incredibly prophetic on a major scale. Wells was a genius and visionary, as demonstrated by many of his other works, but this book is clearly one of his best. He predicts nuclear warfare years before research began and describes the chain reactions involved and the resulting radiation. He describes a weapon of enormous destructive power, used from the air that would wipe out everything for miles, and actually

used the term "atomic bombs." This book may have been at least part of the original inspiration for the development of atomic weapons, as well as presenting many other ideas that would ultimately come to pass. Some ideas may still be coming, including a one-world government referred to as The World Republic, that will attempt to end all wars.

African-American architects have been designing and building houses and public buildings since 1865. Although many of these structures survive today, the architects themselves are virtually unknown. This unique reference work brings their lives and work to light for the first time. Written by 100 experts ranging from architectural historians to archivists, this book contains 160 biographical, A-Z entries on African-American architects from the era of Emancipation to the end of World War II. Articles provide biographical facts about each architect, and commentary on his or her work. Practical and accessible, this reference is complemented by over 200 photographs and includes an appendix containing a list of buildings by geographic location and by architect.

In this authoritative and lively book, Doug Schmidt traces bowling's roots from a German religious rite centuries ago to the sport that made Milwaukee famous. From the taverns and saloons that housed recreational games to the sell-out crowds and million-dollar beer sponsorships of televised tournaments, this well-illustrated book covers both sport and city, charting the changing face of bowling over the century. Packed with memorable showdowns and improbable heroes, "They Came to Bowl" will take you back to the changing lanes of bowling in Milwaukee and the sport as a whole."

This thesis argues that a shift in the doctrine, organization, equipment and training of armies is required due to a shift in the nature of war. This thesis refers to the "new way of war" as Fourth Generation War (4GW) and this analysis is restricted to the army component of the defense forces. Armies at present are geared to fight the earlier generation of attrition and maneuver wars. In 4GW, an army structured for earlier generations of warfare is militarily dysfunctional. The thesis statement is: Infantry based armies practicing unconventional warfare (UW) are essential for the 4GW battlefield. The thesis argues for the conventionalization of UW. Hypothesis One states that heavy armor/artillery based armies should give way to infantry based armies. Hypothesis Two states that the military doctrine of these infantry based armies should be based on UW. The thesis explains 4GW and examines the relationship between terrorism and 4GW. It studies the impact of 4GW on the Principles of War. It examines whether Special Forces (SF) are the panacea for 4GW and whether increasing the size of SF is the solution. Lastly, the thesis discusses the changes required in the army to fight in a 4GW environment and provides recommendations.

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface.
