~~Killing Star Pellegrino Charles George~~

The Killing Star is a hard science fiction novel by American writers  
Charles R. Pellegrino and George Zebrowski, published in April  
1995. It chronicles a sudden alien invasion in a late 21st century  
technological utopia, while covering other several speculative  
fiction ideas such as sublight interstellar travel, genetic cloning,  
virtual reality, advanced robotics, etc.

~~Killing Star, The: George Zebrowski, Charles Pellegrino ...~~

Now, I really wanted to like The Killing Star. Pellegrino and Zebrowski's novel is beloved in some sci-fi circles, and I can see why: their vision of the galaxy is a brutal place, where any civilization becomes an existential threat the moment it develops interstellar rockets, and the only logical action is to exterminate the other sp

Such is the premise of *The Killing Star*, a hard science fiction novel written in 1995 by Charles Pellegrino and George Zebrowski. The first hint humanity gets that spacefaring aliens exist is the detection of gamma rays consistent with antimatter-powered engines. Our elation is short-lived, however.

archaeological treasure of all time, Captain Jean-Luc Picard hopes to discover the origin of humanoid life throughout the galaxy -- or perhaps the ultimate secret of the Borg. But when a neutron star approaches on a collision course with the sphere, a mission of discovery becomes a desperate race against time. The many sentient species inhabiting the sphere face extinction -- can even the Starship Enterprise save them all?

A fascinating look at Pompeii, Herculaneum and the Vesuvius eruption in comparison with other historically significant volcanic eruptions, including the World Trade Center disaster. The eruption of Mount Vesuvius in AD 79, which obliterated the Roman towns of Pompeii and Herculaneum, was a disaster that resounds to this day. Now palaeontologist Charles Pellegrino presents a wealth of

# Online Library Killing Star Pellegrino Charles George Zebrowski

new knowledge about the doomed towns – and brings to vivid life the people, their last moments, and the aftermath. The lessons learned from modern scrutiny of that ancient eruption produce disturbing echoes in the present. Dr Pellegrino, who worked at Ground Zero in the aftermath of the 9/11 attack, shares his unique knowledge of the strange physics of volcanic 'downblast' and 'collapse column', drawing a direct link from past to present, and providing readers with a poignant glimpse into the last moments of the 'American Vesuvius'.

Soon to be a Netflix Original Series! "Wildly imaginative."

near-future trilogy is the first chance for English-speaking readers to experience this multiple-award-winning phenomenon from Cixin Liu, China's most beloved science fiction author. In *The Dark Forest*, Earth is reeling from the revelation of a coming alien invasion-in just four centuries' time. The aliens' human collaborators may have been defeated, but the presence of the sophons, the subatomic particles that allow Trisolaris instant access to all human information, means that Earth's defense plans are totally exposed to the enemy. Only the human mind remains a secret. This is the motivation for the Wallfacer Project, a daring plan that grants four men enormous resources to design secret strategies, hidden through deceit and misdirection from Earth and Trisolaris alike. Three of the Wallfacers are influential statesmen and scientists, but the fourth is a total unknown. Luo Ji, an

# Online Library Killing Star Pellegrino Charles George Zebrowski

unambitious Chinese astronomer and sociologist, is baffled by his new status. All he knows is that he's the one Wallfacer that Trisolaris wants dead. The Three-Body Problem Series The Three-Body Problem The Dark Forest Death's End Other Books Ball Lightning Supernova Era To Hold Up The Sky (forthcoming) At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

A member of the team that discovered the Titanic on the ocean floor recreates the final day of the ship in vivid detail using new technology to peer deeper into the ship than anyone has ever looked. Reprint.

Science and science fiction have become inseparable--with common

# Online Library Killing Star Pellegrino

## Charles George Zebrowski

stories, interconnected thought experiments, and shared language. This reference book lays out that relationship and its all-but-magical terms and ideas. Those who think seriously about the future are changing the world, reshaping how we speak and how we think. This book fully covers the terms that collected, clarified and crystallized the futurists' ideas, sometimes showing them off, sometimes slowing them down, and sometimes propelling them to fame and making them the common currency of our culture. The many entries in this encyclopedic work offer a guided tour of the vast territories occupied by science fiction and futurism. In his Foreword, David Brin says, "Provocative and enticing? Filled with 'huh!' moments and leads to great stories? That describes this volume."

## Charles George Zebrowski

Oceanographer Cary Parker leads a CIA-backed team in a race to recover a priceless book from the wreck of the Titanic.

George Weller was a Pulitzer Prize–winning reporter who covered World War II across Europe, Africa, and Asia. At the war’s end in September 1945, under General MacArthur’s media blackout, correspondents were forbidden to enter both Nagasaki and Hiroshima. But instead of obediently staying with the press corps in northern Japan, Weller broke away. The intrepid newspaperman reached Nagasaki just weeks after the atomic bomb hit the city. Boldly presenting himself as a U.S. colonel to the Japanese military, Weller set out to explore the devastation. As Nagasaki’s first outside observer, long before any American medical aid arrived, Weller witnessed the bomb’s effects and wrote “the anatomy of

# Online Library Killing Star Pellegrino

radiated man.” He interviewed doctors trying to cure those dying mysteriously from “Disease X.” He typed far into every night, sending his forbidden dispatches back to MacArthur’s censors, assuming their importance would make them unstoppable. He was wrong: the U.S. government censored every word, and the dispatches vanished from history. Weller also became the first to enter the nearby Allied POW camps. From hundreds of prisoners he gathered accounts of watching the atomic explosions bring an end to years of torture and merciless labor in Japanese mines. Their dramatic testimonies sum up one of the least-known chapters of the war—but those stories, too, were silenced. It is a powerful experience, more than 60 years later, to walk with Weller through the smoldering ruins of Nagasaki, or hear the sagas of prisoners who have just learned that their torment is over, and watch one of

# Online Library Killing Star Pellegrino

## Charles George Zebrowski

the era's most battle-experienced reporters trying to accurately and un sentimentally convey to the American people scenes unlike anything he—or anyone else—knew. Weller died in 2002, believing it all lost forever. Months later, his son found a fragile copy in a crate of moldy papers. This historic body of work has never been published. Along with reports from the brutal POW camps, a stirring saga of the worst of the Japanese “hellships” which carried U.S. prisoners into murder and even cannibalism, and a trove of Weller's unseen photos, *First into Nagasaki* provides a moving, unparalleled look at the bomb that killed more than 70,000 people and ended WWII. Amid current disputes over the controlled embedding of journalists in war zones and a government's right to keep secrets, it reminds us how such courageous rogue reporting is still essential to learning the truth.
