the galloglas and

The events of
1000-1130 were
crucial to the
successful
emergence of the
medieval kingdom
of the Scots.

Yet this is one

of the least
researched
periods of
Scottish
history. We
probably now
know more about
the Picts than
the post-1000
events that
underpinned the
spectacular
expansion of the
small kingdom

which came to dominate north Britain by the 1130s. This expansion included the defeat and absorption of other significant cultural and political groups to the north and south of the

core kingdom,
and was
accompanied by
the introduction
of reformed
monasticism. But
perhaps the most
momentous
process amongst
all these
political and
cultural changes
was the move
towards the

domination of
the kingship by
just one segment
of the royal
kindred, the
sons of King
Máel Coluim mac

Margaret. The
story of how
these sons
managed to
