Tales of the Forest By: Alexander L. T. LeBlanc Alexander L. T. LeBlanc has spent much of his youth in the forests of Pennsylvania; it is there that he learned the value in observing and listening. In his works he draws inspiration and ideas from all around him to craft stories to entertain the reader with dreams and inspire a thought in one's mind. Tales of the Forest aims to offer ideas and conceptive thoughts to the minds of the reader, while inviting them to a world for them to explore and imagine. Stories range from a caterpillar who finds the courage to face the future, a Scorpion who abandons his hate for a new start in life, to a Beggar who finds something more valuable than gold or gems. Within these pages you can find an inviting new world that welcomes any traveler or seeker of the fantastic. A familiar setting with a touch of magic is granted as you wander through this forest and experience the life that dwells within the wood. Thank you for your curiosity. Now allow us repay you with some tales from the forest.

Join Willow the mischevious Kitten as she discovers all of the new adventures awaiting her when she arrives at her new home in the country.

Eebies isn't a very disciplined kitten. His mom warned him not to play in the forest, but he didn't listen. That's how he found himself in the Nether, a bizarre world inhabited by scary creatures. In the company of a ghost, almost cheerful witch, Eebies develops supernatural powers. Will this be enough to fight against Endernova's army, the Enderman, who want to rule over the Overworld? In order to save his friends, Eebies must become the champion of the Nether, as the prophecy of The Chosen One tells . . .

Rabbit Tales is a collection of four charming and entertaining stories for young readers. It provides a wonderful opportunity for the reader to immerse themselves in a fantastical world full of funny and clever critters that will excite the imagination.

Now in a 2-in-1 volume, revisit the magic of the Five Hundred Kingdoms, witty retellings of the fairy tales you thought you knew, by New York Times bestselling author Mercedes Lackey. The Sleeping Beauty In Rosamund's realm, happiness hinges on a few simple beliefs. For every princess there's a prince. Stepmothers should never be trusted. And bad things come to those who break with Tradition. But when Rosa is pursued by a murderous huntsman and then captured by dwarves, her beliefs go up in smoke. Determined to escape and save her kingdom, she agrees to one of her stepmother's risky incantations.. Beauty and the Werewolf The eldest daughter is often doomed in fairy tales. But Bella vows to escape the usual pitfalls. Anxious to avoid the Traditional path, Bella dons a red cloak and ventures into the forbidden forest to consult with "Granny," the local wisewoman. But on the way home she's attacked by a wolf—who turns out to be a cursed nobleman.

"A purrrrr-fect collection of three classic Little Golden Books all about kittens!"--

A heartwarming collection of stories about the cats and the lives they've touched around them, previously published in the anthology The Little Book of Puppy Love Sometimes, animals come into our lives just when we need them most. In these true stories about the powerful connections between people and their cats, Jo Couderd and Jennifer Bazye Sander uncover the simple joys of loving and being loved by our favorite feline companions. In this book you'll meet the lost cat who comforts a grieving woman, the orange tabby with psychic abilities, the purring kitten rescued from a freeway overpass, the litter of strays who made "cat people" out of their resistant owners, and many, many more. These animals don't just bring us comfort—they save our lives. Couderd and Sander celebrate the everyday miracles that happen when we form bonds with animals. This new edition combines charming stories into a perfect collection for anyone who melts at every kitty meow.

With insight and wit, Robert J. Richards focuses on the development of evolutionary theories of mind and behavior from their first distinct appearance in the eighteenth century to their controversial state today. Particularly important in the nineteenth century were Charles Darwin's ideas about instinct, reason, and morality, which Richards considers against the background of Darwin's personality, training, scientific and cultural concerns, and intellectual community. Many critics have argued that the Darwinian revolution stripped nature of moral purpose and ethically neutered the human animal. Richards contends, however, that Darwin, Herbert Spencer, and their disciples attempted to reanimate moral life, believing that the evolutionary process gave heart to unselfish, altruistic behavior. "Richards's book is now the obvious introduction to the history of ideas about mind and behavior in the nineteenth century."-Mark Ridley, Times Literary Supplement "Not since the publication of Michael Ghiselin's The Triumph of the Darwinian Method has there been such an ambitious, challenging, and methodologically self-conscious interpretation of the rise and development and evolutionary theories and Darwin's role therein."-John C. Greene, Science "His book . . . triumphantly achieves the goal of all great scholarship: it not only informs us, but shows us why becoming thus informed is essential to understanding our own issues and projects."-Daniel C. Dennett, Philosophy of Science

Two evolutionists debate the intellectual roots of Darwin's theories, drawing connections to German Romanticism, the Scottish Enlightenment, and more. Charles Darwin is an icon of modern science, and his theory of evolution is commonly referenced by scientists and nonscientists alike. Yet there is a surprising amount we don't know about the father of modern evolutionary thinking, his intellectual roots, or even the science he produced. Debating Darwin brings together two leading Darwin scholars—Robert J. Richards and Michael Ruse—to engage in a spirited and insightful dialogue, offering their interpretations of Darwin and their critiques of each other's thinking. Examining key disagreements about Darwin that continue to confound even committed Darwinists, Richards and Ruse offer divergent views on the man and his ideas. Ruse argues that Darwin was quintessentially British, part of an intellectual lineage tracing back to the Industrial Revolution and thinkers such as Adam Smith and Thomas Robert Malthus. Ruse sees Darwin's work in biology as an extension of their theories. In contrast, Richards presents Darwin as more cosmopolitan, influenced as much by French and German thinkers. Above all, argues Richards, it was Alexander von Humboldt who gave Darwin the conceptual tools he needed to formulate his evolutionary hypotheses. Together, the authors show how these contrasting views on Darwin's influences can be felt in theories about the nature of natural selection, the role of metaphor in science, and the place of God in Darwin's thought. The book concludes with a jointly authored chapter that brings this debate into the present, focusing on human evolution, consciousness, religion, and morality.
