If learners in the classroom are to be excited by mathematics, teachers need to be both well informed about current initiatives and able to see how what is expected of them can be translated into rich and stimulating classroom strategies. The book examines current initiatives that affect teaching mathematics and identifies pointers for action in the classroom. Divided into three major sections, it looks at: the changing mathematics classroom at primary, secondary and tertiary level major components of the secondary curriculum practical pedagogical issues of particular concern to mathematics teachers. Each issue is explored in terms of major underpinnings and research in that area, and practical ideas can be drawn from the text and implemented in the reader's classroom practice. Each chapter has been written by a well-respected writer, researcher and practitioner in their field and all share a common goal: to look thoughtfully and intelligently at some of the practical issues facing mathematics teachers and offer their perspectives on those issues.

The change process is described in this text which examines the historical, social and economic influences on education policy reform. Chapters look at cross-cultural experiences of educational change and policy implementation as the authors lead us to an understanding of processes and forces involved. The three themes covered in this volume are: politics and reform; politics into policy and policy implementation; and educational reform phenomena. The authors argue that change takes a predictable format and, once understood, can be directed and managed.; This text is intended to be of interest to those involved in the planning and implementation of change and, along with Volume 2 "Case Studies in Educational Change", point the way to effective management of such change processes.
