Professional technicians have relied on the Chilton Labor Guide estimated repair times for decades. This latest edition expands on that reliability by including technical hotline feedback and research from professional labor experts. The labor times reflect actual vehicle conditions found in the aftermarket, including rust, wear and grime. Available in both hardcover and CD-ROM, this completely revised manual provides thousands of labor times for 1981 through current year domestic and imported vehicles. All times reflect technicians' use of aftermarket tools and training.

AUTOMOTIVE MAINTENANCE AND LIGHT REPAIR (AM&LR) was designed to meet the needs of automotive programs that teach to the competencies specified in NATEF's Maintenance & Light Repair (MLR) program standard. Designed for entry-level students, the primary features of AM&LR are the focus on the foundational principles and knowledge for the MLR tasks, and the activities to supplement student learning. In addition, Automotive Maintenance and Light Repair is written to engage students not just in automotive competencies, but also in applied academic skills and lifelong learning skills, including math, science, and communication. As featured on Fresh Air with Terry Gross A do-it-yourself guide to auto maintenance, roadside emergencies, and the real scoop on how women can get honest car service at the garage, from engineer turned auto mechanic and award-winning entrepreneur Patrice Banks. Do you feel lost when explaining your car problems to a mechanic? Do you panic when something goes wrong with your ride? Have you felt like you were being overcharged or pressured into unnecessary add-ons at the auto shop? Fear no more: The Girls Auto Clinic Glove Box Guide has got your back. So many women feel powerless, nervous, or embarrassed when taking our cars in for a repair, and yet we outnumber men both as drivers and as customers at auto repair shops The time has come for us to grab the wheel and finally take control of our cars. Filled with easy-to-follow illustrations and instructions, great tips, and lifesaving rules of thumb, The Girls Auto Clinic Glove Box Guide will help take away the confusion and mystery surrounding cars, teach women what they need to know about how their cars work, and what they need to do to keep them running smoothly. Patrice Banks was once like most of us: a self-professed “auto airhead” who was clueless about car maintenance, yet convinced that mechanics were taking advantage of her. Now she’s an auto pro devoted to empowering women to learn basic car repairs and knowing what to do in an emergency. So whether you get a flat tire when you’re stranded in the middle of nowhere, your car overheats, or a mysterious dashboard light suddenly starts blinking, help is just a reach-in-the-glove-box away.

THIS EDITION OF THE STANDARDIZED TRUCKING RATE GUIDE IS FOR ZONE 7 DESTINATIONS (AL, FL, GA, MS, TN) FOR 5-AXLE DD/RGN IS STRG RIGHT FOR ME? Do you haul Oversized & Overweight (OS/OW) cargo? Are you a shipper or manufacturer that frequently needs to price or budget the cost of large trucking projects? The Standardized Trucking Rate Guide ("STRG") is a manual that was designed for the driver or transportation professional in need of solid transportation rates, fast. STRG is simple and fast to use. First, in every STRG, there are more than 50,000 rates displayed for up to 25 major routes in any particular zone: Houston to Miami, Houston to Atlanta, Houston to Nashville, etc. Rates are all displayed in easy-to-read tables that can be searched dictionary-style. No kidding. If you can look up a word in the dictionary, then you can use the STRG. Effectively

Get Free Labor Rate Guide Automotive

doubling or tripling the 50,000+ rates displayed, STRG also includes an internal pricing "yardstick" that allows you to quickly revise a rate up or down if your cargo is picking up or delivering within 50 miles of the proposed lane. Picking up in Galveston instead of Houston? Use the yardstick to increase the rate. Delivering in Panama City, FL? Simply use the rates to Tallahassee and use the yardstick to subtract from the rate. Rates are all tabled as a possible two-way conversation between a shipper and a driver/carrier, and the rates are assigned 1 of 5 STRG pricing classifications: Cheap, Bargain, Decent, Good, and Urgent. WHY IS STRG NEEDED? The STRG will help you quickly navigate the every-day, repetitive, time-consuming and resource draining BS that you encounter daily with pricing OS/OW loads. How much of your day is spent pricing cargo? How much of your day is spent quoting cargo that you know you'll likely never move? How many opportunities to do business do you miss out on, because you do not have a fast and powerful answer to the question: What does it cost? If you're a driver or transportation professional, then you already know drivers don't want to haul cheap freight. Sometimes, you can get the "friends & family discount" and get cargo hauled for a bargain. Of course, more trucks are available for a decent rate. But, mostly, drivers and carriers want a good rate. And, it goes without saying that the carriers in your back-yard that run the newest equipment, carry higher cargo insurance limits, staff mechanics and employ the families and support the schools of your community want an urgent rate, a get-a-truck-now rate and maybe even a little more. The time to standardize trucking has arrived. Pricing guides are

typically the origins of creating a powerful agreement-reality of what constitutes fair business. The used car industry was standardized with the Kelley Blue Book & NADA Guides. Some states are even assessing sales tax based on Kelley Blue Book values, even if the selling price of the vehicle is below the recommended KBB price. The automotive repair industry was standardized with the Chilton's Guide (and, a few others). And, these days, the only factors that make-up the difference in price from shop to shop is the hourly rate for labor and the amount of mark-up on the parts. Trucking is an enormous \$700 billion / year industry. By comparison, the used car industry is about half at \$350 billion per year. The Kelley Blue Books and NADA Guides were revised accordingly, every year, as the used car market changed and new model years were added. Likewise, revisions to the STRG will be issued as market conditions change and warrant a revision. FUTURE ONLINE VERSION Be on the look-out for the online version of STRG, as well, where we will show-case a dynamic version of our technology with features and functions that expand the STRG manual by layering in additional features that cannot be put in a manual.
