The recovery period after cardiac arrest is now considered a key element of survival, according to updated guidelines for emergency CPR and heart care that also tackle health disparities and opioid overdoses. The new guidelines issued Wednesday by the American Heart Association provide science-based recommendations to maximize someone's chance of surviving cardiac arrest, which occurs when the heart suddenly stops beating.

Updated CPR guidelines address physical and emotional ...
The 2020 AHA Guidelines for CPR and ECC reflect the latest global resuscitation science and treatment recommendations derived from the 2020 International Consensus on CPR and ECC with Treatment Recommendations (CoSTR). This AHA Guideline is considered the gold standard with regard to clinical recommendations in the practice of resuscitation science not only in North America, but around the world.

The new CPR guidelines (2010) are meant to encourage untrained bystanders to help a person who collapses, and to avoid being paralyzed into not assisting by the fear of doing something wrong. Ideally, the sequence is pretty easy. The victim collapses from a heart attack or other heart problem and is unresponsive and isn't breathing.

~~New CPR Guidelines and NFL Tackles by MedicineNet.com~~

The American Heart Association announced its newest CPR recommendations on October 16 th, 2015. The new CPR guidelines are based on the latest scientific data from the previous 5 years. The new update has placed limits on how fast and deep chest compressions should be performed. The guidelines are updated every five years.

~~New American Heart Association CPR Guidelines~~

Global CPR Guidelines Every five years, the International Liason Committee on Resuscitation meets to discuss the latest studies and research and release global guidelines and protocol for how CPR is performed. ILCOR last released guidelines in 2015 and will release new information in 2020. The members of ILCOR are:

In an era of transition from classic Cardiopulmonary resuscitation (CPR) to assisted device-CPR or hemodynamic driven CPR, this book, published by InTechOpen, highlights some interesting aspects of resuscitation. Divided in three sections, the research presented emphasizes the details of resuscitation in special circumstances to possible future applications in the field. The authors offer us not only a vigorous review of the current literature but also a research road map for further advancement.
