You've taken your introduction to evaluation course and are about to do your first evaluation project. Where do you begin? Interactive Evaluation Practice: Managing the Interpersonal Dynamics of Program Evaluation helps bridge the gap between the theory of evaluation and its practice, giving students the specific skills they need to use in different evaluation settings. Jean A. King and Laurie Stevahn present readers with three organizing frameworks (derived from social interdependence theory from social psychology, evaluation use research, and the evaluation capacity building literature) for thinking about evaluation practice. These frameworks help readers track the various skills or strategies to use for distinctive evaluation situations. In addition, the authors provide explicit advice about how to solve specific evaluation problems. Numerous examples throughout the text bring interactive practice to life in a variety of settings.

The International Board for the Certification of Safety Managers (IBFCSM) has designated this text as the Primary Study Reference for those preparing to sit for the Certified Hazard Control Manager (CHCM) and the Certified Hazard Control Manager-Security (CHCM-SEC) Examinations. Introduction to Hazard Control Management: A Vital Organizational Function explains how proven management and leadership principles can improve hazard control and safety management effectiveness in organizations of all types and sizes. This introductory text addresses hazard control and safety management as organizational functions, instead of just programs. It not only supplies a broad overview of essential concepts—including identifying, analyzing, and controlling hazards—but also promotes the importance of safe behaviors. Written by the Executive Director of IBFCSM, the book covers a broad array of hazards that can exist in most organizations. It focuses on the need to use good leadership, effective communication, and proven management techniques to prevent organizational losses. Addresses the inter-relationships of various organizational functions that support hazard control, accident prevention, and safety Includes an overview of emergency management, hazardous materials, and fire safety management Reviews occupational health, radiation safety, and emerging hazards such as nanotechnology and robotic safety Emphasizing the importance of effective communication skills in hazard control efforts, this book promotes an understanding of system safety methodologies and organizational culture to help you control hazards, prevent accidents, and reduce other losses in your organization. It expands on the foundational principles contained in the pamphlet: The Management Approach to Hazard Control. This book is an ideal reference for anyone wanting to learn more about managing hazards, encouraging safe behaviors, and leading hazard control efforts.

First released in the Spring of 1999, How People Learn has been expanded to show how the theories and insights from the original book can translate into actions and practice, now making a real connection between classroom activities and learning behavior. This edition includes far-reaching suggestions for research that could increase the impact that classroom teaching has on actual learning. Like the original edition, this book offers exciting new research about the mind and the brain that provides answers to a number of compelling questions. When do infants begin to learn? How do experts learn and how is this different from non-experts? What can teachers and schools do with curricula, classroom settings, and teaching methods--to help children learn most effectively? New evidence from many branches of science has significantly added to our understanding of what it means to know, from the neural processes that occur during learning to the influence of culture on what people see and absorb. How People Learn examines these findings and their implications for what we teach, how we teach it, and how we assess what our children learn. The book uses exemplary teaching to illustrate how approaches based on what we now know result in in-depth learning. This new knowledge calls into question concepts and practices firmly entrenched in our current education system. Topics include: How learning actually changes the physical structure of the brain. How existing knowledge affects what people notice and how they learn. What the thought processes of experts tell us about how to teach. The amazing learning potential of infants. The relationship of classroom learning and everyday settings of community and workplace. Learning needs and opportunities for teachers. A realistic look at the role of technology in education.

International Education Inquiries is a book series dedicated to realizing the global vision of Education 2030. This vision involves "ensuring inclusive and equitable quality education and promoting lifelong learning opportunities for all." The founding editors seek to provide a forum for the diverse voices of scholars and practitioners from across the globe asking questions about transforming the vision of Education 2030 into a reality. Published chapters will reflect a variety of formats, free of methodological restrictions, involving disciplinary as well as interdisciplinary inquiries. We expect the series will be a leading forum for pioneers redefining the global discussion about the people, places and perspectives shaping Education 2030 outcomes. Education 2030 topics of interest include, but are not limited to, • Improving access to quality early childhood development, care, and pre-primary education; • Ensuring equal access for all women and men to affordable and quality education; • Increasing the number of youth and adults who have skills relevant for sustainable living and livelihoods; • Ensuring equal access for the vulnerable, including persons with disabilities, indigenous peoples and children in vulnerable situations; • Achieving levels of literacy and numeracy required to engage in communities and employment; • Acquiring the knowledge and skills needed to promote sustainable development, including: * Human right * Gender equality, * Promotion of a culture of peace and non-violence, * Global citizenship education, * The appreciation of cultural diversity and of culture's contributions to sustainable development, • Providing safe, non-violent, inclusive and effective learning environments for all; • Recruiting, preparing, supporting, and retaining quality teachers.

A surprisingly simple way for students to master any subject--based on one of the world's most popular online courses and the bestselling book A Mind for Numbers A Mind for Numbers and its wildly popular online companion course "Learning How to Learn" have empowered more than two million learners of all ages from around the world to master subjects that they once struggled with. Fans often wish they'd discovered these learning strategies earlier and ask how they can help their kids master these skills as well. Now in this new book for kids and teens, the authors reveal how to make the most of time spent studying. We all have the tools to learn what might not seem to come naturally to us at first--the secret is to understand how the brain works so we can unlock its power. This book explains: • Why sometimes letting your mind wander is an important part of the learning process • How to avoid "rut think" in order to think outside the box • Why having a poor memory can be a good thing • The value of metaphors in developing understanding • A simple, yet powerful, way to stop procrastinating Filled with illustrations, application questions, and exercises, this book makes learning easy and fun.

For more than 20 years, Network World has been the premier provider of information, intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations. Readers are responsible for designing, implementing and managing the voice, data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce.

30 Independent Practice Packets That Help Children Learn Key Phonics Skills and Set the Stage for Reading SuccessThese easy-to-manage, ready-to-reproduce practice packets are a perfect way to target the phonics skills children need to master. Children can work through the packets independently and at their own pace. Covers letter-sound relationships, beginning and ending consonants, short vowels, long vowel patterns, phonograms, variant vowels, consonant clusters and digraphs, word structure, and more Fun formats include word-shape recognition puzzles, fill-in rhymes and stories, word searches, and more Fosters independent learning Great classroom management tool Effective for second language learners and RTI instruction Flexible and easy to use in class or as homework

Since the publication of the Institute of Medicine (IOM) report Clinical Practice Guidelines We Can Trust in 2011, there has been an increasing emphasis on assuring that clinical practice guidelines are trustworthy, developed in a transparent fashion, and based on a systematic review of the available research evidence. To align with the IOM recommendations and to meet the new requirements for inclusion of a guideline in the National Guidelines Clearinghouse of the Agency for Healthcare Research and Quality (AHRQ), American Psychiatric Association (APA) has adopted a new process for practice guideline development. Under this new process APA's practice guidelines also seek to provide better clinical utility and usability. Rather than a broad overview of treatment for a disorder, new practice guidelines focus on a set of discrete clinical questions of relevance to an overarching subject area. A systematic review of evidence is conducted to address these clinical questions and involves a detailed assessment of individual studies. The quality of the overall body of evidence is also rated and is summarized in the practice guideline. With the new process, recommendations are determined by weighing potential benefits and harms of an intervention in a specific clinical context. Clear, concise, and actionable recommendation statements help clinicians to incorporate recommendations into clinical practice, with the goal of improving quality of care. The new practice guideline format is also designed to be more user friendly by dividing information into modules on specific clinical questions. Each module has a consistent organization, which will assist users in finding clinically useful and relevant information quickly and easily. This new edition of the practice guidelines on psychiatric evaluation for adults is the first set of the APA's guidelines developed under the new guideline development process. These guidelines address the following nine topics, in the context of an initial psychiatric evaluation: review of psychiatric symptoms, trauma history, and treatment history; substance use assessment; assessment of suicide risk; assessment for risk of aggressive behaviors; assessment of cultural factors; assessment of medical health; quantitative assessment; involvement of the patient in treatment decision making; and documentation of the psychiatric evaluation. Each guideline recommends or suggests topics to include during an initial psychiatric evaluation. Findings from an expert opinion survey have also been taken into consideration in making recommendations or suggestions. In addition to reviewing the available evidence on psychiatry evaluation, each guideline also provides guidance to clinicians on implementing these recommendations to enhance patient care.
