Get a unique, conceptual approach to nursing care in this rapidly changing healthcare environment. Lewis's Medical-Surgical Nursing, 11th Edition gives you a solid foundation in medical-surgical nursing. This thoroughly revised text includes a more conversational writing style, an increased focus on nursing concepts and clinical trends, strong evidence-based content, and an essential pathophysiology review. Content covers all aspects of nursing care including health promotion, acute intervention, and ambulatory care. Helpful boxes and tables make it easy for you to find essential information, and a building-block approach makes even the most complex concepts simple to grasp. Key topics such as interprofessional care, delegation, safety, and prioritization are integrated throughout. Additionally, extensive drug therapy information and diagnostic studies tables give you a full picture of care. Best of all | a complete collection of learning and study resources helps you learn more effectively and offers valuable, real-world preparation for clinical practice.

The Simulation Learning System (SLS) integrates simulation technology into your medical-surgical nursing course by providing realistic scenarios and supportive learning resources that correspond to Lewis: Medical-Surgical Nursing, 8th Edition. The SLS offers targeted reading assignments and critical thinking exercises to prepare you for the simulation experience; access to patient data with a shift report and fully-functional electronic medical record (EMR); post-simulation exercises including charting and documentation activities in the EMR, reflective journaling, and concept mapping; and review resources including animations, videos, and textbook references. Simulation with the SLS is a complete learning experience that bridges the gap between lecture and clinicals to prepare you for the real world of nursing. STUDENT ACCESS ONLY - INSTITUTIONAL LICENSE REQUIRED.

Lewis's Medical Surgical Nursing ANZ 5th edition continues as the most comprehensive, go-to reference for developing the core aspects of professional nursing care in Australia and New Zealand. With a clear framework of person-centred care, critical thinking, clinical reasoning and evidence-based practice underpinning the assessment and management of adults with complex, acute and chronic healthcare issues, the 5th edition provides nursing students with the foundations for developing expert clinical practice. Thoroughly revised, the new edition responds to key health priorities, providing an innovative approach to addressing Indigenous health in Australia and New Zealand. Greater emphasis is also given to the issues of: self-care; examination of the nurse's role within an interprofessional team; and management of the deteriorating patient, to reflect the changing nature of nursing practice in the contemporary healthcare environment. Additional resources on Evolve Book on VitalSource Student and Instructor Resources Review Questions Conceptual Care Map creator Student Case studies Fluids and Electrolytes utorial Nursing Care Plans Instructor Resources Test Bank PowerPoint slides Image bank Now available in either hard cover or 2-volume set paperback. formats New chapters: Chapter 3: Stress and coping. This chapter explores theoretical models of stress, the impact of stress on human functioning, and strategies for coping with stress in the context of nursing practice and healthcare delivery Chapter 5: Working with Indigenous peoples of Australia and New Zealand. Co-authored by highly respected Indigenous and non-Indigenous academics from Australia and New Zealand, the chapter role-models Indigenous and non-Indigenous health professionals working alongside each other to improve health outcomes, and the practical role that nurses can play to improve the healthcare experiences of Indigenous people. Chapter 69: Recognising and responding to the deteriorating patient. Authored by one of Australia's leaders in emergency response education, this chapter is designed to develop capability in relation to the National Safety and Quality Health Service Standards 2017, specifically Standard 8: Recognising and responding to acute deterioration. Chapter 70: Cardiopulmonary resuscitation: basic and advanced life support. Based on the Australian and New Zealand Committee on Resuscitation (ANZCOR) guidelines, this chapter promotes a problem-solving approach to the management of a patient in cardiac arrest by providing the science behind the techniques and interventions used to treat a patient in cardiac arrest.

This convenient, money-saving package is a must-have for students training for a career in nursing. It includes Lewis' Medical-Surgical Nursing Single Volume Text, 6th edition and Giddens' Virtual Clinical Excursions 3.0 for Lewis' Medical-Surgical Nursing, 6th edition.

Get a leg up in your medical-surgical nursing class and on the NCLEX examination with this essential study guide. Corresponding to the chapters in the 11th edition of Lewis' market-leading text Medical-Surgical Nursing: Assessment and Management of Clinical Problems, this study guide offers a complete review of the important information in your Lewis text as well as a wide variety of purposeful exercises to help you apply your understanding of key nursing concepts. Questions reflect the most current NCLEX test plan and include multiple choice, prioritization, delegation, case studies, and alternate item formats. Plus, answers for all exercises are included in the back of the book to give you immediate feedback on your understanding and make studying easier overall. A wide variety of clinically relevant exercises and activities include NCLEX-examination-style alternate item questions, multiple-choice questions, prioritization questions, delegation, and case studies. Answers to all questions located in the back of the book provide you with immediate feedback and help make your study time more efficient overall. Attractive four-color design helps you better retain key information. NEW! Updated content reflects the information revisions in the new 11th edition of Lewis's Medical-Surgical Nursing text.

Binder-Ready Edition: This loose-leaf copy of the full text is a convenient, accessible, and customizable alternative to the bound book. With this binder-ready edition, you can personalize the text to match your unique study needs! Get a unique, conceptual approach to nursing care in this rapidly changing healthcare environment. Lewis's Medical-Surgical Nursing, 11th Edition gives you a solid foundation in medical-surgical nursing. This thoroughly revised text includes a more conversational writing style, an increased focus on nursing concepts and clinical trends, strong evidence-based content, and an essential pathophysiology review. Content covers all aspects of nursing care including health promotion, acute intervention, and ambulatory care. Helpful boxes and tables make it easy for you to find essential information, and a building-block approach makes even the most complex concepts simple to grasp. Key topics such as interprofessional care, delegation, safety, and prioritization are integrated throughout. Additionally, extensive drug therapy information and diagnostic studies tables give you a full picture of care. Best of all - a complete collection of learning and study resources helps you learn more effectively and offers valuable, real-world preparation for clinical practice. Content written and reviewed by leading experts in the field ensures that information is comprehensive, current, and clinically accurate. Interprofessional Care tables and sections in all management chapters emphasize the importance of total patient care in today's health care settings and outline the role of each provider in managing disorders. Bridge to NCLEX Examination review questions at the end of each chapter reinforce key content while helping you to prepare for the NCLEX examination with both standard and alternate item format questions. Check Your Practice boxes challenge you to think critically and interact with patient data. Informatics in Practice boxes discuss how technology is used by nurses and patients in healthcare settings. Evidence-based practice boxes help you understand how to apply the latest research to real-life patient care. Safety Alerts throughout the book highlight patient safety issues and focus on the latest National Patient Safety Goals. UNIQUE! Nursing management is presented in a consistent and comprehensive format, addressing the unique approaches to nursing care. Case studies throughout text emphasize prioritization, delegation, and concept mapping to help you learn to prioritize and delegate patient care. Separate chapter on Genetics focuses on practical application to nursing care of patients. Genetics in Clinical Practice boxes cover key topics such as genetic testing, Alzheimer's disease, sickle cell disease, and genetics-related ethics issues. Genetic Risk alerts and Genetic Link headings highlight specific genetic issues related to body system assessments and disorders. Ethical/Legal Dilemmas boxes promote critical thinking for timely and sensitive ethical and legal issues. Pathophysiology Map flow charts make it easier for you to visualize and understand changes occurring in major diseases. Focused Assessment tables reflect a realistic "assessment on the run" approach and offer brief checklists for evaluating the status of previously identified health problems and monitoring for signs of new problems. Extensive drug therapy content includes Drug Therapy tables and concise Drug Alerts highlighting important safety considerations for key drugs. Promoting Population Health tables summarize government health care goals as they relate to specific disorders and identify important strategies for the prevention and early detection of diseases. Nutritional Therapy tables summarize nutritional interventions and strategies for promoting healthy lifestyles in patients with various conditions. Promoting Health Equity boxes and a dedicated chapter on health disparities and culturally competent care highlight risk factors and important issues related to the nursing care of various ethnic groups. Complementary and Alternative Therapies boxes summarize what you need to know about the clinical uses, effects, and nursing implications of herbal remedies and complementary and alternative treatment options. Nursing interventions and nursing diagnoses are listed in order of priority. Nursing Management boxes highlight the nurse's role in working with members of the interprofessional team and also cover specific topics and skills related to delegation. Assessment Abnormalities tables alert the nurse to frequently encountered abnormalities and their possible etiologies. Core clinical content focuses on highlighting and incorporating QSEN competencies. Emergency Management tables outline the treatment of health problems most likely to create medical emergencies. Learning Outcomes and Key Terms help you identify the key content for that chapter. Health History tables present key questions to ask patients related to a specific disease or disorder. Patient and Caregiver teaching tables provide critical information to help you educate others who will be helping to care for the patient. Gerontology and chronic illness included throughout the text under Gerontologic Considerations headings and in Gerontologic Assessment tables. Nursing Assessment tables summarize the key subjective and objective data related to common diseases. Gender Differences boxes discuss how women and men are affected differently by conditions such as pain and hypertension. Diagnostic Studies tables provide details of commonly used lab tests that help assess various body systems. Over 60 nursing care plans clearly shows the linkages among NIC, NOC, and nursing diagnoses, and applies them to nursing practice. Over 800 full-color illustrations and photographs clearly demonstrate disease processes and related anatomy and physiology. NEW! Conversational, reader-friendly writing style makes it easier to understand nursing concepts. NEW use of nursing diagnosis language (ICNP) smoothes your transition into practice, as the International Classification for Nursing Practice is a common language shared with many electronic health record documentation systems. NEW! Increased focus on concepts throughout the text includes a new Concepts Table of Contents that lists the most common exemplars with page number references, a new Problems Related to Comfort and Coping section, and the most relevant concepts listed at the start of each chapter. NEW! Additional body map images are added throughout text.
