Learning and Memory provides students with a clear, balanced, and integrated presentation of major theoretical perspectives foundational to the study of human learning and memory. Author Darrell Rudmann uses an engaging personal writing style appropriate for students with little or no previous background in psychology to discuss topics including the major behaviorism theories of learning, modern cognitive theories of memory, social learning theories, the roles of emotion and motivation in learning, and the well-established neurological underpinnings of these perspectives. A concluding chapter on learning and memory concepts in the real world shows students to how these concepts are applied in various industries, from advertising to education and the media.

Mastering the World of Psychology is a brief, paperback text focused on supplying the most support for student learning and student success. It makes the connection between scientific principles and the everyday lives of today's diverse student population.

For undergraduate courses in Child Development taught Chronologically, Boyd/Bee provides students the most support for learning and success. The Growing Child emphasizes how the three domains of development - physical, cognitive, and socio-emotional - interact with each other and with the environment to affect developmental outcomes. Featuring an innovative student-focused format, it provides the self-assessment tools necessary to keep students engaged in active learning from start to finish, as well as the most support to help students organize, understand, and apply the material.
