This unique book provides a multidisciplinary review of current, climate-change research projects at universities around the globe, offering perspectives from all of the natural and social sciences. Numerous universities worldwide pursue state-of-the-art research on climate change, focussing on mitigation of its effects as well as human adaptation to it. However, the 2015 Paris 21st Conference of the Parties of the United Nations Framework Convention on Climate Change (UNFCCC) (COP 21) " demonstrated that there is still much room for improvement in the role played by universities in international negotiations and decision-making on climate change. To date, few scientific meetings have provided multidisciplinary perspectives on climate change in which researchers across the natural and social sciences could come together to exchange research findings and discuss methods relating to climate change mitigation and adaption studies. As a result the published literature has also lacked a broad perspective. This book fills that gap and is of interest to all researchers and policy-makers concerned with global climate change regardless of their area of expertise.

The book provides a comprehensive overview of the hydrology of the Nile River, especially the ecohydrological degradaton and challenges the basin is facing, the impact of climate change on water availability and the transboundary water management issues. The book includes analysis and approaches that will help provide different insights into the hydrology of this complex basin, which covers 11 countries and is home to over 300 million people. The need for water-sharing agreements that reflect the current situations of riparian countries and are based on equitable water- sharing principles is stressed in many chapters. This book explores water resource availability and quality and their trends in the basin, soil erosion and watershed degradation at different scales, water and health, land use and climate change impact, transboundary issues and water management, dams, reservoirs and lakes. The link between watershed and river water quantity and quality is discussed pointing out the importance of watershed protection for better water resource management, water accessibility, institutional set-up and policy, water demand and management. The book also presents the water sharing sticking points in relation to historical treaties and the emerging water demands of the upstream riparian countries. The need for collaboration and identification of common ground to resolve the transboundary water management issues and secure a win-win is also indicated.

This expansive reference examines the many types of Family Life Education (FLE) programs being offered around the world, reflecting a myriad of cultures and contexts. Coverage identifies core FLE content areas including parenting education, human sexuality, and interpersonal relationships, and details their programming in various countries over six continents, the Caribbean, and the Middle East. Contributors discuss complex challenges of program design, implementation, and evaluation, as well as connections between FLE and family prevention and intervention services. This knowledge is of great theoretical and practical utility across various fields, and is of particular interest to those developing programs for diverse populations. This unique volume: Presents in-depth information on Family Life Education programs from different countries around the world. Discusses how the socio-historic, political, and economic context of a country impacts its families and family services and programs. Covers current topics including poverty, domestic violence, and immigration. Encourages best practices and thorough understanding of the country /region. Offers recommendations for family service providers. Global Perspectives on Family Life Education is a trove of vital knowledge benefitting scholars and researchers as well as professors, postgraduates, graduate and undergraduate students, and practitioners in the family sciences, family life education, family therapy, social work, child and family studies, psychology, sociology, social work, cultural studies, and urban studies.
