"Quite ambitious, tracing religion in the United States from European colonization up to the 21st century.... The writing is strong throughout."--Publishers Weekly (starred review) "One can hardly do better than Religion in American Life.... A good read, especially for the uninitiated. The initiated might also read it for its felicity of narrative and the moments of illumination that fine scholars can inject even into stories we have all heard before. Read it."--Church History This new edition of Religion in American Life, written by three of the country’s most eminent historians of religion, offers a superb overview that spans four centuries, illuminating the rich spiritual heritage central to nearly every event in our nation’s history. Beginning with the state of religious affairs in both the Old and New Worlds on the eve of colonization and continuing through to the present, the book covers all the major American religious groups, from Protestants, Jews, and Catholics to Muslims, Hindus, Mormons, Buddhists, and New Age believers. Revised and updated, the book includes expanded treatment of religion during the Great Depression, of the religious influences on the civil rights movement, and of utopian groups in the 19th century, and it now covers the role of religion during the 2008 presidential election, observing how completely religion has entered American politics.

At once historically and theoretically informed, these essays invite the reader to think of religion dynamically, reconsidering American religious history in terms of practices that are linked to specific social contexts. The point of departure is the concept of "lived religion." Discussing such topics as gift exchange, cremation, hymn-singing, and women's spirituality, a group of leading sociologists and historians of religion explore the many facets of how people carry out their religious beliefs on a daily basis. As David Hall notes in his introduction, a history of practices "encompasses the tensions, the ongoing struggle of definition, that are constituted within every religious tradition and that are always present in how people choose to act. Practice thus suggests that any synthesis is provisional." The volume opens with two essays by Robert Orsi and Danièle Hervieu-Léger that offer an overview of the rapidly growing study of lived religion, with Hervieu-Léger using the Catholic charismatic renewal movement in France as a window through which to explore the coexistence of regulation and spontaneity within religious practice. Anne S. Brown and David D. Hall examine family strategies and church membership in early New England. Leigh Eric Schmidt looks at the complex meanings of gift-giving in America. Stephen Prothero writes about the cremation movement in the late nineteenth century. In an essay on the narrative structure of Mrs. Cowman’s Streams in the Desert, Cheryl Forbes considers the devotional lives of everyday women. Michael McNally uses the practice of hymn-singing among the Ojibwa to reexamine the categories of native and Christian religion. In essays centering on domestic life, Rebecca Kneale Gould investigates modern homesteading as lived religion while R. Marie Griffith treats home-oriented spirituality in the Women’s Aglow Fellowship. In "Golden- Rule Christianity," Nancy Ammerman talks about lived religion in the American mainstream.

Can also be used as supplemental reading for individual religion courses. Living Religions Western Traditions is a highly readable and stimulating survey of the major global religions and new religious movements that originated in the West. Evocative illustrations, first-person interviews of ordinary people and boxes uncovering the spiritual roots of public figures bring this text to life.

Carl Hermann Voss has succeeded in presenting a very knowledgeable and comprehensive, and at the same time highly readable, account of the world's major religions: their historical development, key personages, and basic tenets. He writes with clarity, insight, and sympathetic understanding. I found this to be an engrossing and illuminating book--Dr. Avraham Harman, The Hebrew University of JerusalemLiving Religions of the World: Our Search for Meaning is both reliable and readable, an excellent combination commending it to students and educated laymen alike. The living faiths, offering real alternatives in a world grown small and compelling every thinking person to make a personal choice, are presented with sympathy and scholarship. There is a fine concluding summary of the major issues of conscience and decision in a generation which displays an upsurge of religious interest frequently along non-traditional paths.--Dr. Franklin H. Littell, Temple University, Philadelphia, PADr. Voss's important scholarly work has always been marked by extraordinary sensitivity combined with wide erudition. This marvelous book shows his many admirers anew how our common search for meaning finds distinct but complementary expression in the major religions of the world.
