Whether for emergency back-up or to be 100% off the grid, Solar Liberty offers solar panel and solar battery installation solutions in New York engineered for reliable, clean energy to power your operation.

This book, Disaster Master Plan: Prepare or Despair It's YOUR Choice, was written to give information to my fellow citizens on "How to" plan for a disaster and where to order disaster kits. I want everyone to have relevant information that they can use, in advance, to prepare their families, neighbors, and businesses, in case of a power outage or disaster. I witnessed Hurricane IVAN (2004) devastation in Pensacola, Florida when it slammed into the Gulf Coast. I stood in long lines on that September day in sweltering heat; I was hot, sweating, and tired. I was frustrated because the lines were a mile long while we stood in line waiting for FEMA and the Red Cross to give us basic supplies, i.e. ice, water, milk, etc. They worked tirelessly with a smile on their face, trying to cheer us. They knew many of us had lost our home. I thought it was be great if I could put together a disaster preparedness kit, in case, this happened again we would be ready. PLEASE PREPARE FOR DISASTER! Hurricane KATRINA (2005) was a catastrophic hurricane which ruthlessly and horrifying demolished the Gulf Coast with raging floods from New Orleans to Mississippi and until this day some of the building have not been rebuilt and many of the residents did not return. GOALS(1) Provide information to everyone on how to prepare for disaster. (2) Assist in revitalizing Detroit, East Side Jefferson Street, from Grosse Pointe to Belle Isle Park.

Raw Survival presents an approach that embraces sustainable living as a solution to meet our daily needs, even if the worst case scenario never unfolds. By living in the spirit of community and in balance with the natural cycles, one can live more fully and enjoy a more enriching, healthy lifestyle. From celebrity raw food chef and educator Lisa Montgomery Raw Survival presents Lisa's philosophy and documents important skills and knowledge needed to answer the eternal question "What if?" What if you lose power? What if you are unable to get food? What if the technology and systems we rely on fail? Raw Survival is an invaluable reference featuring a wealth of important sustainability tips and simple raw food recipes specially geared towards living "on or off the grid" as a vegetarian or raw foodist. Filled with recipes and tips for "off-the-grid" living, Raw Survival includes everything you need to know to make your raw food diet part of a fully sustainable lifestyle. Raw Survival is the green living guide...with raw food flair! EASY TO USE AND ACCESSIBLE TO EVERYONE. With over 80 simple, delicious recipes, Raw Survival is not just for raw foodists or vegetarians, but is suitable for anyone who wants to prepare nutritious dishes using minimal equipment and processing. **TIMELY AND INFORMATIVE.** In response to the myriad of natural disasters and our increasingly hectic lifestyles, this book offers simple solutions to implementing a raw food diet in tandem with a sustainable emergency response plan. **INVALUABLE SURVIVAL GUIDE.** The book features important skills to grow, gather, prepare, and store your own food as well as promote energy independence. Knowledge and simplicity are behind the philosophy that informs Raw Survival. This book contains over 80 healthy recipes that can be created without exotic ingredients and extensive preparation. Also included are helpful tips, ideas, and guidelines for surviving unexpected catastrophes or simply navigating a hectic lifestyle. Raw Survival also provides information to guide you towards energy independence if living "off the grid" is your ultimate dream. Raw Survival belongs in every home.

The Cat in the Hat takes readers on an out of this world reading adventure through outer space! The Cat in the Hat's Learning Library is a nonfiction picture book series that introduces beginning readers ages 5-8 to important basic concepts. Learn about the solar system, planets, the constellations, and astronauts, and explore the wonders of space with the help of everyone's favorite Cat in the Hat! Perfect for aspiring astronauts, or any kid who loves learning and science. The universe is a mysterious place. We are only just learning what happens in space. Featuring beloved characters from Dr. Seuss's The Cat in the Hat, the Learning Library are unjacketed hardcover picture books that explore a range of nonfiction topics about the world we live in and include an index, glossary, and suggestions for further reading. "Pretty much all the stuff you need to know is in Dr. Seuss." -President Barack Obama

This publication, prepared jointly by the WHO, the World Meteorological Organization and the United Nations Environment Programme, considers the public health challenges arising from global climate change and options for policy responses, with particular focus on the health sector. Aspects discussed include: an overview of historical developments and recent scientific assessments; weather and climate change; population vulnerability and the adaptive capacity of public health systems; the IPCC Third Assessment report; tasks for public health scientists; the health impacts of climate extremes; climate change, infectious diseases and the level of disease burdens; ozone depletion, ultraviolet radiation and health; and methodological issues in monitoring health effects of climate change.

This book focuses on solar-energy-based renewable energy systems and discusses the generation of electric power using solar photovoltaics, as well as some new techniques, such as solar towers, for both residential and commercial needs. Such systems have played an important role in the move towards low-emission and sustainable energy sources. The book covers a variety of applications, such as solar water heaters, solar air heaters, solar drying, nanoparticle-based direct absorption solar systems, solar volumetric receivers, solar-based cooling systems, solar-based food processing and cooking, efficient buildings using solar energy, and energy storage for solar thermal systems. Given its breadth of coverage, the book offers a valuable resource for researchers, students, and professionals alike.

Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-enabled magazine, and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish. Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor-industry awards are measured.
