Grand Prix de la Francophonie 2015: Best French-Language Manuscript! Paris, 22nd century. In an ultra-liberal society where everything is for sale, against a background of multiple virtual realities, the latest craze is personal creation, or “ self art ” . Titania is one of the many names of a young woman addicted to this art: everything about her is artificial and modified. The story relates the fleeting love affair between a rather old-fashioned poet in mourning and this elusive creature. “ Through the medium of an enthralling love story, Titania 2.0 brilliantly poses the existential questions of our time. Pauline Pucciano's style in this book is a skillful balance of fluidity, poetry and precision. The tale is discerning, tender and incisive, and the plot rides a wave of irresistible suspense. ” Wilfried N'Sond é , Grand Prix de la Francophonie. Pauline Pucciano specializes in fantasy fiction. Inventive writing and psychologically convincing characters are constants in her diverse worlds, invariably characterized by an unerring esthetic sense.

This open access book presents a large number of innovations in the world of operational testing. It brings together different but related areas and provides insight in their possibilities, their advantages and drawbacks. The book not only addresses improvements in the quality of educational measurement, innovations in (inter)national large scale assessments, but also several advances in psychometrics and improvements in computerized adaptive testing, and it also offers examples on the impact of new technology in assessment. Due to its nature, the book will appeal to a broad audience within the educational measurement community. It contributes to both theoretical knowledge and also pays attention to practical implementation of innovations in testing technology.

Ross Morrison McGill, aka @TeacherToolkit believes that becoming a teacher is one of the best decisions you will ever make, but after more than two decades in the classroom, he knows that it is not an easy journey! Packed with countless anecdotes, from disastrous observations to marking in the broom cupboard, TE@CHER TOOLKIT is a compendium of teaching strategies and advice, which aims to motivate, comfort, amuse and above all reduce the workload of a new teacher. The book includes humorous illustrations, photocopyable templates, a new-look 5 minute plan and QR codes to useful videos. This limited edition hardback version will be an

invaluable addition to your school CPD library or a long-lasting bible to keep with you throughout your teaching career. As anyone who has followed him on Twitter knows, Ross is not afraid to share the highs and lows of his own successes and failures. He strives to share great teaching practice, to save you time and to ensure you are the best teacher you can be, whatever the new policy or framework. His eagerly-awaited new book continues in this vein and is a must-read for all new teachers. Vitruvian teaching will help you survive your first five years: Year 1: Be resilient (surviving your NQT year) Year 2: Be intelligent (refining your teaching) Year 3: Be innovative (take risks) Year 4: Be collaborative (share and work with others now your classroom practice is secure) Year 5: Be aspirational (moving towards middle leadership) Start working towards Vitruvian today.

Have you fallen for the lie that God won't part the waters again? Ask you to build an ark? Slay a giant with a slingshot? Ralph Wingate, Jr. believes it's possible for today's Christians to expect a life of spiritual adventure, even amidst office computers, utility bills, and junk mail. Drawing from Hebrews 11, Wingate searches the souls of imperfect people, from harlots to kings, who had one thing in common: they cultivated an insatiable, extraordinary desire to see God on Earth. These improbable heroes and heroines understood that God is not only the rewarder of those who seek Him, but the reward itself. Citing present-day examples from his own congregations, the author offers practical advice on how you can develop a fresh yearning to seek God's presence within contemporary settings. He invites you on a holy, hazardous quest

that will turn your feet toward the uncharted paths of heroes and heroines. If you lack vitality in your Christian walk, this book will energize your journey. It blasts through stone walls of bygone centuries to reveal the same God that Moses, Noah, David, and others worshipped so that you, too, can fall prostrate in His presence today.

Sound Reproduction: The Acoustics and Psychoacoustics of Loudspeakers and Rooms, Third Edition explains the physical and perceptual processes that are involved in sound reproduction and demonstrates how to use the processes to create high-quality listening experiences in stereo and multichannel formats. Understanding the principles of sound production is necessary to achieve the goals of sound reproduction in spaces ranging from recording control rooms and home listening rooms to large cinemas. This revision brings new science-based perspectives on the performance of loudspeakers, room acoustics, measurements and equalization, all of which need to be appropriately used to ensure the accurate delivery of music and movie sound tracks from creators to listeners. The robust website (www.routledge.com/cw/toole) is the perfect companion to this necessary resource.

Super powered humans started appearing 30 years ago. Now, they are everywhere. Bob Moore, Private Eye, dares to investigate those who could incinerate him with a thought. When he is called to help a super from his past, however, he'll be pushed to his limit. When supers and the police think there is no crime, can he get to the truth?
