By welding the European aerospace industry into a cohesive force and directing the pace of technological change in civil air transport, Airbus Industrie has successfully challenged the competition and now ranks as one of the world’s largest commercial jetliner manufacturers. Airbus traces the history of Airbus Industrie’s rise to greatness, describing the consortium’s head-to-head match with Boeing, and how it is revolutionizing the airliner industry. Each Airbus model is covered in detail.

A concise resource to the best practices and problem-solving ideas for understanding the airline network planning and scheduling process Airline Network Planning and Scheduling offers a comprehensive resource that is filled with the industry’s best practices that can help to inform decision-modeling and the problem-solving process. Written by two industry experts, the book is designed to be an accessible guide that contains information for addressing complex challenges, problems, and approaches that arise on the job. The chapters begin by addressing the complex topics at a broad, conceptual level before moving on to more detailed modeling in later chapters. This approach follows the standard airline planning process and reflects the duties of the day-to-day job of network/schedule planners. To help gain a practical understanding of the information presented, each chapter includes exercises and data based on real-world case studies. In addition, throughout the book there are graphs and illustrations as well as, information on the most recent advances in airline network and planning research. This important resource: Takes a practical approach when detailing airline network planning and scheduling practices as opposed to a theoretical perspective Puts the focus on the complexity and main challenges as well as current practices and approaches to problem-solving and decision-making Presents the information in a logical sequence that begins with broad, conceptual topics and gradually delves into more advanced topics that address modeling Contains international standard airline planning processes, the day-to-day responsibilities of the job, and outlines the steps taken when building an airline network and schedule Includes numerous case studies, exercises, graphs, and illustrations throughout Written for professionals and academics, Airline Network Planning and Scheduling offers a resource for understanding best practices and models as well as the challenges involved with network planning and scheduling.

Mais uma edição de nosso anuário de aviação comercial, regional, de carga aérea e aeroportos. Cada dia fi ca mais trabalhoso editá-lo pela volatilidade do mercado. Companhias simplesmente pararam de voar, fecharam seus escritórios e sumiram, outras faliram ou estão com os voos parcialmente suspensos. Com a Covid-19, novidades no quesito abrir e fechar fronteiras influenciam muito o fato de manter uma rede aérea e voos regulares. Um dia, pode voar para um país, já no outro, não, exigindo medidas drásticas no setor. Outras não querem publicar seus resultados pela fragilidade dos balanços e sem saberem ao certo o futuro. Pior ainda, muitas nem sequer divulgam vergonha de dizer se estão ou não inativas. Por esta razão e pelo fato de que a maioria cancelou contratos com assessorias de imprensa, além do home offi ce, que difi cultou falar com os representantes das empresas, a missão de bem informar os leitores torna-se quase impossível. E fazíamos antes da pandemia, porém contém as informações básicas, para se ter uma ideia do mercado. Foram quase três meses de uma batalha árdua, para tentar informar nossos queridos leitores. Esperamos que, no próximo ano, tenhamos um clima melhor para dar maior cobertura a este setor importantíssimo da economia mundial.
