Lyman 50 th Edition Reloading Handbook . Just to set the stage, I have nine lineal feet of book shelves devoted to reloading material. It starts from the 1890's and ends with the Lyman 50 th. Everyone should have a copy of this edition for several reasons. First is expanded data to cover the cartridges from the last ten years.

Lyman 50th Edition Reloading Handbook - Cast Bullet Forum

Lyman reloading kits, presses and dies have provided generations of reloaders with all the high quality equipment they need to start reloading and to pass down this hobby to the next generation of shooters. Lyman casting furnaces and bullet moulds are a must-have for any serious bullet caster.

Lyman Reloading Products | Firing Solutions

Gentlemen, I have several reloading manuals, most of the major ones actually. Is there a manual that has more cast loads in it? I have the lyman cast volume 4, however it does not have many lee molds in it. Right now I only have lee molds because they are cheap and seem relatively easy to use. Does the new 2020 lee manual cover the molds they make?

Reloading manuals for cast boolits

Welcome to the new Castpics Load lookup. This database has 6400 loads for cast bullet loads. Data can be searched by cartridge name, powder name, and bullet weight. You may wish to peruse the list of cartridges first as many times the difference in 45-70 and 45/70 may mean finding data or drawing a blank. Remember that all data was safe at the time it was tested, but this does not mean it is safe in your firearm.

HP-38 is the same exact powder as Winchester 231, and Lyman lists loads for 231 with the 175 gr. cast bullet. Just use that and you'll be fine, but of course work up your load as normal. Both Win. 231 and Hodgdon HP-38 are quite a bit slower burning powders than Bullseye, VThillman, not the other way around. Hope this helps. Fred

ISO load data for 40 S&W 175gr Lead Bullet | The High Road

By the way, my favorite cast bullet load for 9mm is 8.0 grains of Alliant Blue Dot pushing a Lee 120 grain TC. Cast in hard Lyman #2 alloy, there will be no leading at 1200fps. MichaelK, Nov 8, 2009 #7

Indispensable information has been funnelled into a huge new edition, completely rewritten and refreshed by Sam Fadala. This textbook for black powder shooters is topped off by a catalog of all currently-manufactured work powder firearms. The ultimate source for black powder.

4 Books on DVD(Art of Bullet Casting;Handloaders' Bullet Making Annual Vol 1&2;Handloaders' Cast Bullet Special Edition)How'to's for casting bullets. A collection of articles taken from years of "Handloader" and "Rifle" magazines covering the basics to more advanced techniques. Get technical and accurate with your casting and swaging.

If you've ever wanted to reload ammunition but didn't know where to start this book is for you. You'll find detailed chapters about primers, cartridge cases, gun powder, and bullets, explaining in layman's terms what they are, variations you'll encounter and the characteristics of each. You'll also learn the different facets of case preparation: which are necessary and which are optional, and how to do them. You'll learn some characteristics of gunpowder and which types work best with bulk measurements. There'll be detailed photos and explanations teaching the process of reloading ammunition. From there you'll be shown how you can gear up to reload your own ammunition even if you don't have much money or space. Although most of the book is geared toward metallic cartridge reloading there's also a chapter on reloading shotgun ammunition. It too, will show you the steps involved and how to become operational with very little money and minimal space requirements. After reading this book the novice reloader will: (a) be capable of making informed choices when purchasing their equipment and components; (b) be able to understand the reloading process and why certain steps are taken or omitted; (c) have a safe, profitable and enjoyable experience from the very beginning.

Do you want to get started in Handloading your own ammunition, but need a step-by-step guide that does a little better at explaining why you're doing things? Just need a little overview on the basic steps before you start buying gear? Need some guidance on what all this stuff is supposed to do for you? This booklet might help you out! At least, I hope it will...It's supposed to. This book will not give you loads for your particular cartridge - there are hundreds of other books for that. This book will give you the basics, and help you understand the actual mechanics of cleaning, depriming, sizing, trimming, powder measuring, and seating a bullet.

DON'T LET THE TITLE of this book fool you, fellows. This is indeed the handbook for commercial bullet casters, but the make-'em-for -money people are not the only ones who need to keep it handy and consult it often. Any basement or garage bullet caster could tear out and throw away its chapters on the excellent machinery that the Magma Engineering Company makes, plus its chapters on doing business on a commercial producer of cast bullets, and he would still have a manual on bullet casting that's worth more than it costs.

Starting from the very beginning, The Practical Guide to Reloading Ammunition will help readers understand the gear they need - and what can wait. Chapter by chapter, the book explains the entire process from brass cleaning to final inspection. Loaded with pictures and illustrations, the process is made simple and clear. With this book, readers will be reloading their own cost-effective ammunition quickly and safely.

In Reloading for Handgunners, the reader will learn the benefits of serious handgun ammunition reloading (decreased cost, increased reliability) in an accessible, step-by-step way. In addition, the reader will learn how to avoid the costly, wasteful errors that plague many reloaders, experienced and novice alike. Finally, the reader will enjoy the vast experience and unique style that have made Patrick Sweeney the country's leading guru on tactical and competition shooting and ammunition. Features: Shortcuts, hints and tips (from a certified master gunsmith, film consultant, and certified Armorer Instructor) to reload your own ammunition and avoid costly errors Loading data for the most popular and asked-about calibers Specialty loading info for: Competition: IPSC/IDPA, Bullseye, Steel Challenge, Cowboy Hunting: heavy magnums and big bores

Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle.
