Mae Among the Stars by Roda Ahmed - Goodreads

Parents need to know that Mae Among the Stars by Roda Ahmed, illustrated by Stasia Burrington, is a picture book biography of Dr. Mae Jemison, the first African-American female astronaut. Since the book is spare, without much concrete information about her life or her path, it's best for the youngest kids, who'll come away with the simple and clear message that when she was young, Dr. Jemison had a dream of what she wanted to do, and her parents encouraged her, even when peers scoffed and ...

space. As an adult, she made this dream a reality when she became the first black female NASA astronaut. Jemison became a medical doctor before applying for NASA's Space Shuttle program. Then, in 1992, she blasted off on the shuttle Endeavour and conducted scientific experiments to test the effects of space on human bone cells. Jemison has dedicated her life to science education and to finding ways to use technology to help communities around the world. Find out how Jemison's passion for science led to her many impressive achievements.

An easy-to-read autobiography of NASA astronaut Scott Kelly, in jacketed hardcover, that takes readers on his awe-inspiring journey from childhood to his record-breaking year among the stars. A autobiography of NASA astronaut Scott Kelly! Scott wasn't sure what he wanted to be when he grew up. He struggled in school and often got in trouble with his twin brother, Mark. Then one day Scott discovered a book about test pilots and astronauts that set him on a new path. His new focus led him to fly higher and higher, becoming first a pilot and then an astronaut, along with his brother--the first twin astronauts in history. But his greatest accomplishment of all was commanding the International Space Station and spending nearly a year in space, which set the record for the longest spaceflight by an American. This story of an ordinary boy who grew up to do extraordinary things will amaze and inspire young readers.

What do you do when it is time to go to bed, but you have toes that are too wiggly, feet that want to run, hips that want to shake, legs that want to jump, and a heart that wants to drum? Good night, Wiggly toes is a fun book that helps you to connect with your wiggle body and helps calm it down. One breath a time.

and do exciting things that girls weren't supposed to be able to do. Only men had the exciting jobs. Kathy liked fishing and swimming; flying planes and studying science. That's what she liked and that's what she decided to do with her life. She followed her heart and eventually became a NASA astronaut and the first woman to walk in space. Kathy wanted to see the whole world and so she did: from space! Backmatter includes further information about Dr. Sullivan and her career, as well as other famous firsts made by women astronauts.

I am brown. I am beautiful. I am perfect. I designed this computer. I ran this race. I won this prize. I wrote this book. A joyful celebration of the skin you're in - of being brown, of being amazing, of being you.

Women in Science and Technology: Mae C. Jemison gives readers in grades 1-3 a brief biography of the first African-American woman astronaut, Mae C. Jemison. Readers will discover that she is also a doctor, dancer, businesswoman, and educator. Learn about how Mae went from a child with big dreams to a woman who inspires many. The biographies in this collection introduce students to influential women in science and technology, from astronauts to medical doctors. Each book includes a glossary, comprehension questions, a time line, and an extension activity.

The Girl Who Could Dance in Outer Space is the second book in The Girls Who Could Series. It tells the tale of young Mae Jemison, the creative girl who became a doctor, an engineer, a dancer, and an astronaut. Mae Jemison teaches us that art and science are natural expressions of creativity and imagination. Nurture them both, and go where your dreams take you! The Girls Who Could is a fun, colorful series of stories about real women who have made a difference in the world through inspired action. By giving young girls examples of people who have done big, amazing things, children grow up with a template of achievement upon which to grow and expand their own dreams and goals. Praise for The Girl Who Could Talk to Computers: "Love love love this book! It is perfect for my small neice, who is always building and doing puzzles -- I can't wait for more books from this authors for kids." "This book is a huge hit at home with at my toy store. Kids love the simple, bright pictures. Grown-ups love the intelligently written rhymes that get across the main message and accomplishments of Grace Hopper's innovative life, without boring or confusing the children. There are sixteen, 4-line stanzas, each accompanied by an illustration. The book is perfect for young kids that are just starting to read, and I really like how it is geared towards inspiring girls, yet the drawings and story is not pink and frilly, so it can just as easily be read to boys, too. The main message of the book is that when you use your head "nothing's impossible, you can do it, you bet!"
