This book is the first in a dedicated series that explores questions of cultural diplomacy and international cultural relations. Drawing on a broad range of disciplinary perspectives, it throws new light on the function and operation of policies that seek to change attitudes, values and behaviours across national boundaries and in diverse geocultural contexts. The specific policies explored relate to ways in which sites of past violence and atrocity are deployed in strategies

of soft power; to the contribution of culture to EU enlargement; to the use of the Russian language as a soft power resource; to the singularities of the Indian cultural diplomacy; to cultural diplomacy as elite legitimation; to the role of diaspora relations in European cultural diplomacy; to the use of film in post-war cultural diplomacy; and to the role assigned to culture in the Canada-EU Comprehensive Economic Trade Agreement. Scholars interested in how cultural and foreign policy intersect in widely differing national contexts will find this book an invaluable resource. It was originally published as a special issue of the International Journal of Cultural Policy.

This book originates from the proceedings of the 10th anniversary conference of the Centre for the Law of EU External Relations (CLEER) in which renowned experts in the field took stock of recent evolutions in the law and practice of the EU's external relations. In particular, the book addresses the question of how the evolving legal and political framework affects the nature of EU external relations law. The contributions discuss the actions (and reactions) of the EU through external action instruments in a number of substantive areas such as migration, trade, neighbouring policies, security and defence. By shedding light on the most significant developments of the past decade this edited volume attests to the ever-evolving nature of the field of EU External Relations Law. Thus, this book is essential reading for academics, practitioners and policy makers at the EU level interested in the field of EU External Relations Law. Dr. W.Th. Douma is an Independent legal expert at the European Environmental Law Consultancy and EU Legal - Centre for European and International Law, both based in The Netherlands, voluntary researcher at Ghent University in Belgium, and Senior Legal Adviser at the Dutch Ministry of Social Affairs and Employment. Prof. Dr. C. Eckes is Professor of European Law at the University of Amsterdam and director of the Amsterdam Centre for European Law and Governance, The Netherlands. Prof. Dr. P. Van Elsuwege is Professor of European Union Law at Ghent University and co-director of the Ghent European Law Institute, Belgium. Dr. E. Kassoti is Senior researcher in EU and International Law at the Asser Institute and academic co-ordinator of the Centre for the Law of EU External Relations (CLEER), The Netherlands. Prof. Dr. A. Ott is Professor of EU External Relations Law and Jean Monnet professor in EU Law at Maastricht University, The Netherlands. Prof. Dr. R.A. Wessel is Professor of European Law and Head of the European and Economic Law Department at the University of Groningen, The Netherlands.

The book offers a comprehensive perspective on the highly topical issue of protecting and promoting labour standards in international economic law and the globalized economy. For the purpose of an in-depth analysis of both the specific and the fundamental aspects in this regard, it combines views from specialized academics of the legal

and political sciences as well as experienced practitioners. The contributions to this book do not only reveal recurring obstacles but also point at best practices and potential for synergies, providing important guidance for future research and practice in international economic and labour law and policy.

The widespread condemnation of drastic price increases on life-saving drugs highlights our growing dependency on and vulnerability to international pharmaceutical conglomerates. However, aren't the interests of the public supposed to supersede the pursuit of private profit? In his new work, *Private Profits versus Public Policy*, Joel Lexchin addresses this question as he examines how public policy with respect to the pharmaceutical industry has evolved in Canada over the past half century. Although the Canadian government is supposed to regulate the industry to serve the needs of public health, waves of deregulatory reforms and intellectual property rights legislation have shifted the balance of power in favour of these companies' quest for profit. Joel Lexchin offers a series of recommendations to tip the scale back in the public's favour. This enlightening work is the first book that deals exclusively with the pharmaceutical industry in Canada in over thirty years.
