Forthcoming
implementation
of international

Get Free Man Diesel Turbo Uk

land European environmental regulations, namely Marpol Annex VI and Directive 2012/33/EU, will force ship owners to assess technologies that can allow them to comply with regulation whilst helping

Get Free Man Diesel Turbo Uk

them to improve their position in an increasingly competitive market. Given the European economy's fragile condition, prevailing uncertainty about its future and about the

Get Free Man Diesel Turbo Uk

future evolution
of key factors
affecting the
outcome of the
ship owners'
decisions,
making the right
choice among the
multiple
feasible
technologies
available
becomes a
considerable

Get Free Man Diesel Turbo Uk

challenge. For the past two years, the undersigned team of analysts have worked together in a study leading towards the publication of this report. This analysis has been the Fundación Valenciaport's

Get Free Man Diesel Turbo Uk

contribution to the European Union (EU) co-funded project "CO2 and ship transport emission abatement by LNG" (the COSTA Action). The COSTA project has been coordinated by the Italian

Get Free Man Diesel Turbo Uk

Ministry of
Infrastructure
and Transport
and co-financed
by the EU's
Trans-European
Network for
Transport (TEN-
T) Programme
under the
Motorways of the
Sea Call 2011.
Our objective
has been to

Get Free Man Diesel Turbo Uk

analyse which technology would give the best results for the ship owner to comply with environmental regulations concerning emissions from a financial point of view. This has been done for those

Get Free Man Diesel Turbo Uk

vessels that are particularly affected by this regulation, that is, each of the 658 vessels deployed in short-sea shipping (SSS) lines calling at core ports in the Mediterranean and Black Sea EU

Get Free Man Diesel Turbo Uk

countries and
Portugal.

Additionally, a
cost-benefit
analysis
including
externalities
has been
conducted. As a
result of this
study, different
scenarios on
technology
uptake towards

Get Free Man Diesel Turbo Uk

2030 for the Southern European SSS fleet have been defined.

Needless to say, there is no certainty of how many of the driving factors will behave in the next 15 years. The results

Get Free Man Diesel Turbo Uk

published in
this report are
not definitive
predictions of
the
Mediterranean
shipping sector
in 2030.

Instead, our
main findings
are intended to
stimulate
discussions
about available

Get Free Man Diesel Turbo Uk

options for the industry. By examining the entire SSS fleet operating in the Mediterranean, Black Sea and Portuguese core ports, we hope to portray a general picture of the most convenient technological

Get Free Man Diesel Turbo Uk

options for
different kinds
of vessels. In
addition, we
hope to draw
attention to the
factors
explaining most
of the
uncertainty over
future results
and provide
useful
information for

Get Free Man Diesel Turbo Uk

both ship owners and policy-makers who may be evaluating policies to foster the adoption of the technologies that are most environmentally friendly and contribute the most to the competitiveness

and shipbuilding
sectors in
Europe.
