C01-Fundamentals of management accounting

The third edition of Management Accounting (Eldenburg et al.) covers all the core topics across the two undergraduate management accounting courses, with an increased New Zealand business focus and more in-depth coverage of not-for-profit organisations. It brings course content to life with rich media such as practitioner videos, case studies and 'In a Nutshell' revision materials embedded at the point of learning.

"Cost Management: Measuring, Monitoring, and Motivating Performance, Third Canadian Edition, was written to help students learn to appropriately apply cost accounting methods in a variety of organizational settings. To achieve this goal, students must also develop professional competencies, such as strategic/critical thinking, risk analysis, decision making, ethical reasoning, and communication. Most textbooks focus on content knowledge and then expect students to "magically" demonstrate professional competencies. As an author team, we bring to this textbook extensive knowledge about cost accounting as well as about the best approaches for teaching and learning professional competencies. This textbook bridges the gap between typical student performance and what we would like students to be able to do by: maintaining a central focus on business decision making; explicitly addressing risk and biases; adopting a writing style that is accessible and interesting to students; concentrating on all types of organizations; focusing on ethical reasoning; simultaneously challenging and guiding students to learn." \u2022 Preface.

Volume one of the Handbooks of Management Accounting Research sets the context for both Handbooks, with three chapters outlining the historical development of management accounting as a discipline and as a practice in three broad geographic settings. The bulk of the first volume then draws together a series of contributions that analyse the scholarly literature in terms of distinct intellectual and theoretical social science perspectives. The volume includes a chapter which looks at work informed by psychology as a base discipline.

The volume also includes a set of chapters that seek to evaluate and explain issues of research method for the different approaches to research found within management accounting. Special pricing available if purchased as a set with Volume 2. Documents the scholarly management accounting literature Publishing both in print, and online through Science Direct International in scope

Provides complete, carefully verified solutions for selected questions, exercises, problems, and activities within the book for learners that wish to check their work.

Covers the strategic management topics in cost accounting. This title helps students to understand about the management and the role of cost accounting in helping an organization succeed. It addresses issues such as: How does a firm compete? and What type of cost management information is needed for a firm to succeed?

SURVEY SAMPLING, 7th Edition, International Edition introduces students to the design and analysis of sample surveys via a practical, engaging approach. First, this introductory text begins with brief chapters focused on the important role that sample surveys play in the modern world. Then, each successive chapter builds on this foundation. These chapters start with the problem, describe the methodology needed for solving the problem, and provide the details of the estimation procedure using a compact presentation of the necessary formulas. Each chapter then works out the practical example in full detail. Finally, at the end of each chapter, SURVEY SAMPLING, 7th Edition, International Edition includes a wealth of exercises that enable students to continue practicing and to stretch their grasp of the content.

Explains basic features and modelling concepts of the various functions of SAS Activity-Based Management, including (but not limited to) building modeling components (such as drivers, modules, and assignments) and working with tasks.
