Command-line tools and applications are software tools for troubleshooting, but some network problems have hardware causes and solutions. Here are some hardware tools that can help you diagnose and solve network issues: Wire Crimpers — A wire crimper (sometimes called a cable crimper) is a tool that attaches media connectors to the ends of cables. You can use it to make or modify network cables.

Try sending a ping to a well-known, large server, such as Google, to see if it can connect with your router. You can ping Google DNS servers by opening the command prompt and typing "ping 8.8.8.8"; you can also add "-t" to the

end (ping 8.8.8.8 -t) to get it to keep pinging the servers while you troubleshoot.
