Integrating Business Management Processes: Volume 2: Support and Assurance Processes (978-0-367-48548-1) Shelving Guide: Business & Management The backbone of any organisation is its management system. It must reflect the needs of the organisation and the requirements of its customers. Compliance with legal requirements and ethical environmental practices contributes towards the sustainability of the management system. Whatever the state of maturity of the management, this book, one of three, provides useful guidance to design, implement, maintain and improve its effectiveness. This volume provides a comprehensive coverage of the key support and assurance processes. Topics include document control, communication, marketing, information systems and technology, human resource management, training and development, customer relations management, financial management and measurement and analysis to name a few. This book, with its series of examples and procedures, shows how organisations can benefit from satisfying customer requirement and the requirements of ISO standards to gain entry into lucrative markets. Titus De Silva is a consultant in management skills development, pharmacy practice, quality management and food safety and an advisor to the newly established National Medicines Regulatory Authority (NMRA) in Sri Lanka.

Tie customer-driven strategies to service operations and process management, and sharpen your focus on creating customer value throughout your entire service organization! This comprehensive, multidisciplinary reference thoroughly covers today's most effective theories and methods for managing service organizations, drawing on innovative insights from economics, consumer behavior, marketing, strategy, and operations management. Leading experts Cengiz Haksever and Barry Render provide crucial insights into emerging service operation and supply chain topics, reinforcing key points with up-to-date case studies. Service Management contains a valuable chapter-length introduction to linear and goal programming and its services applications; and also addresses many other topics ignored by competitive texts, such as: Service SCM methods and approaches Focusing on customers and their service purchase behavior Service productivity Managing public and private nonprofit service organizations Vehicle routing and scheduling Ethical challenges to SCM Service Management will be an invaluable resource for senior and mid-level managers throughout any service organization, and for students and faculty in any graduate or upper-level undergraduate program in service management, service operations management, or operations management

Today, opportunities and challenges of available technology can be utilized as strategic and tactical resources for your organization. Conversely, failure to be current on the latest trends and issues of IT can lead to ineffective and inefficient management of IT resources. *Managing Information Technology in a Global Economy* is a valuable collection of papers that presents IT management perspectives from professionals around the world. The papers introduce new ideas, refine old ones and possess interesting scenarios to help the reader develop company-sensitive management strategies.

"The objectives of the proposed book are to provide techniques and tools appropriate for building application portfolios and develop strategies that increase financial performance"--Provided by publisher.

This book examines trends and challenges in research on IT governance in public organizations, reporting innovative research and new insights in the theories, models and practices within the area. As we noticed, IT governance plays an important role in generating value from organization's IT investments. However there are different challenges for researchers in studying IT governance in public organizations due to the differences between political, administrative, and practices in these organizations. The first section of the book looks at Management issues, including an introduction to IT governance in public organizations; a systematic review of IT alignment research in public organizations; the role of middle managers in aligning strategy and IT in public service organizations; and an analysis of alignment and governance with regard to IT-related policy decisions. The second section examines Modelling, including a consideration of the challenges faced by public administration; a discussion of a framework for IT governance implementation suitable to improve alignment and communication between stakeholders of IT services; the design and implementation of IT architecture; and the adoption of enterprise architecture in public organizations. Finally, section three presents Case Studies, including IT governance in the context of e-government strategy implementation in the Caribbean; the relationship of IT organizational structure and IT governance performance in the IT department of a public research and education organization in a developing country; the relationship between organizational ambidexterity and IT governance through a study of the Swedish Tax Authorities; and the role of institutional logics in IT project activities and interactions in a large Swedish hospital.

This book contains selected papers presented at the seventh Conference on Working Group 3.7 of the International Federation for Information Processing. The focus of Working Group 3.7 is on ITEM: Information Technology in Educational Management. The overall goal of the conference was to demonstrate and explore directions for developing and improving all types of educational institutions through ITEM.

This book constitutes the proceedings of the 5th Enterprise Engineering Working Conference, EEWC 2015, held in Prague, Czech Republic, during May 15-19, 2015. EEWC aims at addressing the challenges that modern and complex enterprises face in a rapidly changing world. The participants of the working conference share a belief that dealing with these challenges requires rigorous and scientific solutions, focusing on the design and engineering of enterprises. The goal of EEWC is to stimulate interaction between the different stakeholders, scientists as well as practitioners, interested in making enterprise engineering a reality. The 10 papers included in this book were presented at EEWC after being carefully reviewed and selected out of 29 submissions. The topics of the presented papers allowed for active participation in interesting discussions and exchange of ideas and stimulated future cooperation among the participants. This made EEWC a real "working conference" contributing to the further development of enterprise engineering as a mature discipline. Topics covered include: enterprise engineering and DEMO; business process management, simulation, and analysis; and complexity, transformation, and modeling.
