After 28 Years of Researching Family History and Genealogy, and much prompting from a number of people, I'm writing this Genealogical Book, "Growing Your Family Tree - Sorting the Wheat from the Chaff". It will be of particular interest to those with Ancestry in Nova Scotia, and Atlantic Canada, but the scope of the book does go beyond those areas, and I hope You enjoy it and it helps You with Your Family History and Growing Your Family Tree. - Brian W. Hurlburt"Brian has sorted the wheat from the chaff in this most informative book on 'Growing Your Family Tree'. Beginning and Seasoned genealogists alike, will find it an essential, informative read!" By Dianne Perrin B.Ed.

This project-oriented facilities design and material handling reference explores the techniques and procedures for developing an efficient facility layout, and introduces some of the state-of-the-art tools involved, such as computer simulation. A "how-to," systematic, and methodical approach leads readers through the collection, analysis and development of information to produce a quality functional plant layout. Lean manufacturing, work cells and group technology, time standards, the concepts behind calculating machine and personnel requirements, balancing assembly lines, and leveling workloads in manufacturing cells, automatic identification and data collection; and ergonomics. For facilities planners, plant layout, and industrial engineer professionals who are involved in facilities planning and design.
