In Maonomics: Why Chinese Communists Make Better Capitalists than We Do, Napoleoni argues just the opposite: what we are witnessing instead is the beginning of the collapse of capitalism and the victory of "communism with a profit motive." Maonomics charts the prodigious ascent of the Chinese economic miracle and the parallel course of the West's ongoing insistence on misconstruing China and its economy even as we acknowledge its growing influence and importance.

Dr Loretta Napoleoni, Economist, author, journalist and political analyst, discusses the themes from her latest book Maonomics – Why Chinese Communists Make Better Capitalists Than We Do. China, she says, has reaped the benefits of Western-invented globalisation and deregulation, yet its economic development offers lessons to the West as the West stumbles from crisis to crisis.

The end of the cold war was thought to signal the triumph of Western capitalism over Communism. In Maonomics: Why Chinese Communists Make Better Capitalists than We Do, Napoleoni argues just the opposite: what we are witnessing instead is the beginning of the collapse of capitalism and the victory of "communism with a profit motive." Maonomics charts the prodigious ascent of the Chinese economic miracle and the parallel course of the West's ongoing insistence on misconstruing China and its economy even as we acknowledge its growing influence and importance. Maonomics is a warning call whereby Western governments can avoid economic collapse by learning how to understand more clearly what the lessons of the Chinese economy really are. Based on first-hand reporting from China during frequent visits in the last several years, Maonomics lends credence to the Chinese view and translates it for Western readers. For example, the Chinese too are attached to their vision of democracy, but it is different from ours. It isn't focused as much on voting as it is economic opportunity and the fair distribution of wealth and prosperity. Napoleoni also separates failed Leninist political ideology from true Marxist theory, showing that Marx's writings do not reject profit so long as it is used to benefit the people. Marx's dictatorship of the proletariat is being realized in China, she argues, where giant steps forward are being made in the name of progress and the wellbeing and prosperity of the Chinese people. Looking at the Chinese economy up close, any economist would be hard pressed to say that they are not on the right track. Here Loretta Napoleoni offers a front row seat on the greatest show on earth: the peaceful economic revolution that is shifting the balance of power in the world from West to East.

September 11, 2001, is considered the main event, but the changes of the decade go far beyond the menace of terrorism and the war on terror. The technological revolution, the wide use of the Internet, and the advent of social media are just some of the innovations that grew to define the decade. The war on terror and its strong rhetoric hid these phenomena. The purpose of this book is to show the true patterns of change—those innovations that will influence coming decades. This is more than a timeline, it is the tale of an extraordinary decade. Within each year, Napoleoni presents events not in a strict chronology but more as we might remember them, often with the most significant events recalled first. Thus the main topics—politics, economics, people, technology, and the environment—cross over constantly, showing how they are all interlinked and how globalization is speeding up the pace of change in our world.

"[John Naisbitt's] vision of the world's economy has the mark of genius." —Minneapolis Star Tribune Internationally-renowned futurist and bestselling author John Naisbitt is back with China's Megatrends, the most comprehensive look at the present and future of China and the transformation that is reshaping its economic, political, and social systems. Since publishing the enormously popular Megatrends—a New York Times bestseller for two years that has been published in 57 countries—John Naisbitt has become the most respected and well-known prognosticator of global trends. To write China's Megatrends, Naisbitt and wife Doris were granted unprecedented access by the Chinese government to all aspects of the country and its social model. Using the same techniques of information gathering and analysis as Megatrends, the Naisbitts present a prescient and unique perspective on the emergent global power and its role in the future of globalization.

What do Eastern Europe's booming sex trade, America's subprime mortgage lending scandal, China's fake goods industry, and celebrity philanthropy in Africa have in common? With biopirates trolling the blood industry, fish-farming bandits ravaging the high seas, pornography developing virtually in Second Life, and games like World of Warcraft spawning online sweatshops, how are rogue industries transmuted into global empires? And will the entire system be transformed by the advent of sharia economics? With the precision of an economist and the narrative deftness of a storyteller, syndicated journalist Loretta Napoleoni examines how the world is being reshaped by dark economic forces, creating victims out of millions of ordinary people whose lives have become trapped inside a fantasy world of consumerism. Napoleoni reveals the architecture of our world, and in doing so provides fresh insight into many of the most insoluble problems of our era.

Economist and best-selling author Loretta Napoleoni traces the link between the finances of the war on terror and the global economic crisis, finding connections from Dubai to London to Las Vegas that politicians and the media have at best ignored. In launching military and propaganda wars in the Middle East, America overlooked the war of economic independence waged by Al-Qaeda. The Patriot Act boosted the black market economy, and the war on terror prompted a rise in oil prices that led to food riots and distracted governments from the trillion-dollar machinations of Wall Street. Consumers and taxpayers, spurred by propaganda fears, were lured into crushing global debt. Napoleoni shows that if we do not face up to the many serious connections between our response to 9/11 and the financial crisis, we will never work our way out of the looming global recession that now threatens our way of life. While we feared that Al-Qaeda might destroy our world, Wall Street ripped it apart.

An unparalleled look into the Iraqi insurgency and the multitude of forces that continue to shape it, Insurgent Iraq: Al-Zarqawi and the New Generation presents a chilling account of the regrouping of terror networks, and the development of an Iraqi resistance since the invasion by coalition forces over two years ago. One of the world's leading specialists on terrorism, economist Loretta Napoleoni is uniquely qualified to make sense of the ways in which terror networks do and do not operate in Iraq, and what role they play in the Iraqi resistance. Is the insurgency in Iraq a counter-Crusade, a national liberation movement, or a civil war? With a complex understanding of all the intricacies inherent in such a question, Napoleoni provides a mindful discussion, offering a much-needed understanding of how the US occupation of Iraq has catalyzed the cultural, religious, and political divides within the country to create a wholly changed, more volatile landscape. Composed of independent Iraqi Jihadist groups, Islamo-Nationalist and Ba'ath party resistance, ethnic infighting between Sunni, Shi'ite and Kurd, and foreign suicide bombers, the resistance is a divided yet maintains one demand: the end of US occupation. Overall, Napoleoni offers a breakdown of the current political landscape in Iraq, and a renovated al-Qaeda. Insurgent Iraq is a necessary read for anyone concerned with the future of Iraq, or seeking greater insight into the U.S.'s critical role in the Middle East.

From its birth in the late 1990s as the jihadist dream of terrorist leader Abu Musab al Zarqawi, the Islamic State (known by a variety of names, including ISIS, ISIL, and al Qaeda in Iraq) has grown into a massive enterprise, redrawing national borders across the Middle East and subjecting an area larger than the United Kingdom to its own vicious brand of Sharia law. In ISIS: The Terror Nation, world-renowned terrorism expert Loretta Napoleoni builds on her international best-selling The Islamic Phoenix, with new chapters on the Islamic State's recruitment of Western women, economic strategy, and recent terrorist attacks around the world. Napoleoni takes us beyond the headlines, demonstrating that while Western media portrays the Islamic State as little more than a gang of thugs on a winning streak, the organization is proposing a new model for nation building. Waging a traditional war of conquest to carve out the twenty-first-century version of the original Caliphate, ISIS uses modern technology to recruit and fundraise while engaging the local population in the day-to-day running of the new state. Rising from the ashes of failing jihadist enterprises, the Islamic State has shown a deep understanding of Middle Eastern politics, fully exploiting proxy war and shell-state tactics. This is not another terrorist network but a formidable enemy in tune with the new modernity of the current world disorder. As Napoleoni writes, "Ignoring these facts is more than misleading and superficial, it is dangerous. 'Know your enemy' remains the most important adage in the fight against terrorism."

As China moved from a planned to a market economy many people expected that China's political system would similarly move from authoritarianism to democracy. It is now clear, however, that political liberalisation does not necessarily follow economic liberalisation. This book explores this apparent contradiction, presenting many new perspectives and new thinking on the subject. It considers the path of transition in China historically, makes comparisons with other countries and examines how political culture and the political outlook in China are developing at present. A key feature of the book is the fact that most of the contributors are China-born, Western-trained scholars, who bring deep knowledge and well informed views to the study.

Argues that the rise of Islamic terrorism is based not on religious fervor but on the desire for financial gain, a wish to separate the Muslim world from the Western economic system, and opposition to corrupt Arab governments.

In her characteristically direct approach, political analyst Loretta Napoleoni takes on the vexed story of North Korea for those of us in the West who remain blinded by its myths and bigotry. This short, informative book is an account of a country central to world politics and yet little understood.
