PowerPivot is a big deal for Excel. PowerPivot is a new feature where Excel will load data into a Data Model that can handle millions of rows. You can create relationships

Read Free Mastering Excel Powerpivot

between tables, build hierarchies and improve the already extensive data analysis capabilities of Excel. In this lesson, I show you how to install Power Pivot, connect to various data sources, build relationships, add time based intelligence to the Data Model and I throw in some more tricks along the way. You must have Excel 2010 or later to use PowerPivot. The screenshots in the lesson are from Excel 2016. Earlier version will look a little different but not substantially so. This lesson come with several follow along workbooks that you can use to work through the exercises as you read the book.

Shows readers how to perform complex data analysis, create reports with the data analysis expressions language, and add hierarchies to data models to enable faster browsing.

Offers information on the patterns and techniques of the formula language DAX.

This is a bundle of all the Mastering Excel lessons that cover the new Excel Power BI tools. If you want to perform heavy duty analysis on large data sets, as in well over 1,000,000 rows, this bundle is for you. These new features let Excel crunch through data extremely efficiently. Even if you don't have massive data sets, you can still use Power View and Power Map to create seriously impressive presentations. Note: You will need Excel 2016 or Office 365 Pro Plus to use all the Power BI features. Excel 2013 will not run all the features covered here. This bundle contains the following lessons: * Mastering Excel: Power Query (Get data form external sources) * Mastering Excel: Power Pivot (Create a data model with tables and relationships) * Mastering Excel: Power View (Create a new type of Excel presentation) * Mastering Excel: Power Map (Show data in animated maps)

Dummies brand If you spend your days analyzing data, Excel PowerPivot & Power Query For Dummies will get you up and running with the rich set of Excel tools and reporting capabilities that will make your life—and work—easier.

Renowned DAX experts Alberto Ferrari and Marco Russo teach you how to design data models for maximum efficiency and effectiveness. How can you use Excel and Power BI to gain real insights into your information? As you examine your data, how do you write a formula that provides the numbers you need? The answers to both of these questions lie with the data model. This book introduces the basic techniques for shaping data models in Excel and Power BI. It ' s meant for readers who are new to data modeling as well as for experienced data modelers looking for tips from the experts. If you want to use Power BI or Excel to analyze data, the many real-world examples in this book will help you look at your reports in a different way—like experienced data modelers do. As you ' ll soon see, with the right data model, the correct answer is always a simple one! By reading this book, you will:

- Gain an understanding of the basics of data modeling, including tables, relationships, and keys
- Familiarize yourself with star schemas, snowflakes, and common modeling techniques
- Learn the importance of granularity
- Discover how to use multiple fact tables, like sales and purchases, in a complex data model
- Manage calendar-related calculations by using date tables
- Track historical attributes, like previous addresses of customers or manager assignments
- Use snapshots to compute quantity on hand
- Work with multiple currencies in the most efficient way
- Analyze events that have durations, including overlapping durations
- Learn what data model you need to answer your specific business questions

About This Book

Read Free Mastering Excel Powerpivot

- For Excel and Power BI users who want to exploit the full power of their favorite tools
- For BI professionals seeking new ideas for modeling data

Microsoft PowerPivot is a free add-on to Excel from Microsoft that allows users to produce new kinds of reports and analyses that were simply impossible before, and this book is the first to tackle DAX formulas, the core capability of PowerPivot, from the perspective of the Excel audience. Written by the world's foremost PowerPivot blogger and practitioner, the book's concepts and approach are introduced in a step-by-step manner tailored to the learning style of Excel users everywhere. The techniques presented allow users to produce, in hours or even minutes, results that formerly would have taken entire teams weeks or months to produce. The "pattern-like" techniques and best practices contained in this book have been developed and refined over two years of onsite training with Excel users around the world, and the key lessons from those seminars costing thousands of dollars per day are now available within the pages of this easy-to-follow guide. This updated edition covers new features introduced with Office 2015.

This Mastering Excel lesson covers Power View. Power View is a new Excel feature that lets you explore you data and create dynamic & interactive presentations. You will start with the basics, creating a List Report, moving onto Matrix Tables, then Cards, Charts, Filters, Slicers and even Maps! This lesson is a bit longer than the rest of the series because it is a big topic. You can do so much with Power View. Once you finish this lesson and you begin to use Power View in your day to day work, be prepared to get questions form everyone about it. You will amaze everyone and yes, this just might make you the office Excel guru. Seriously, it is

Read Free Mastering Excel Powerpivot

that impressive. Like all the other Mastering Excel lessons, this one also come with follow along workbooks. Click on the link in the book to receive the materials in your email. THIS IS IMPORTANT. PLEASE READ THIS: You MUST have the right version of Excel to use Power View. Power View and Power Pivot are only available in the Office Professional Plus and Office 365 Professional Plus editions, and in the standalone edition of Excel 2013. Excel 2016 has Power View but Microsoft has removed the Power View button. In the lesson, I show you how to add it to the ribbon.
