seventeen-year-old Marie de France is sent to England to be the new prioress of an impoverished abbey, its nuns on the brink of starvation and beset by disease. At first taken aback by the severity of her new life, Marie finds focus and love in collective life with her singular and mercurial sisters. In this crucible, Marie steadily supplants her desire for family, for her homeland, for the passions of her youth with something new to her: devotion to her sisters, and a conviction in her own divine visions. Marie, born the last in a long line of women warriors and crusaders, is determined to chart a bold new course for the women she now leads and protects. But in a world that is shifting and corroding in frightening ways, one that can never reconcile itself with her existence, will the sheer force of Marie's vision be bulwark enough? Equally alive to the sacred and the profane, Matrix gathers currents of violence, sensuality, and religious ecstasy in a mesmerizing portrait of consuming passion, aberrant faith, and a woman that history moves both through and around. Lauren Groff's new novel, her first since *Fates and Furies*, is a defiant and timely exploration of the raw power of female creativity in a corrupted world.

If you are an ACT practitioner or mental health professional, this eagerly awaited resource is an essential addition to your professional library. Acceptance and commitment therapy (ACT) is an evidence-based therapy that has been successful in treating a variety of psychological issues, such as anxiety, depression, substance abuse, trauma, eating disorders, and more. In contrast to other treatment options, ACT has proven extremely effective in helping clients who are “stuck” in unhealthy thought patterns by encouraging them align their values with their thoughts and actions. However, the ACT model is complex, and it’s not always easy to use. Traditionally, ACT is delivered with a focus around six core processes that are often referred to as the hexaflex: cognitive defusion, acceptance, contact with the present moment, observing the self, values, and committed action. Each of these core processes serves a specific function, but they are often made more complex than needed in both theory and in practice. So what if there was a way to simplify ACT in your sessions with clients? Edited by clinical psychologists and popular ACT workshop leaders Kevin L. Polk and Benjamin Schoendorff, *The ACT Matrix* fuses the six core principles of acceptance and commitment therapy (ACT) into a simplified, easy-to-apply approach that focuses on client actions and behavior as workable or unworkable, rather than good or bad. Most importantly, you’ll learn how this innovative approach can be used to deliver ACT more effectively in a variety of settings and contexts, even when clients are resistant or unmotivated to

This volume examines a variety of philosophical approaches that seek to formulate practical guidelines or norms for human actions and behavior in different areas of society, including politics, cultural traditions, the environment, business management, architecture, and medicine. Written by a team of international authors, this volume features thirteen surveys. It begins with an exploration of ethics in politics and cultural traditions. From genocide to the unequal distribution of wealth, it examines many of the harms that currently affect societies throughout the world and considers a way that those in politics can follow to provide better care for all their populations. Next, the book looks at the relation between ethics and cultural traditions. It features a paper that examines the tension that often exists between the past and the present, with a special focus on the history of India. This volume also considers the idea of a universal system of ethics, presents a practical approach to value-based management in private and public organizations, and examines ethics in medicine. In addition, this volume includes coverage of a new type of ethics called Eco-ethica, proposed by the Japanese philosopher Tomonobu Imamichi, which seeks to answer the question of how men and women can "live better" or "live together with each other" in a systematized, technological age.
