Here is a chapter from Mastering Technical Analysis, a practical examination of the key tools of technical analysis--how they work, why they work, and which work best in specific situations. Written by one of the founding members of the Market Technicians Association, it will provide you with the guidance and insights you need to improve your trading performance, by removing the guesswork from every move you make.

Here is a chapter from The Essentials of Risk Management, a practical, non-ivory tower approach that is necessary to effectively implement a superior risk management program. Written by three of the leading figures with extensive practical and theoretical experience in the global risk management and corporate governance arena, this straightforward guidebook features such topics as governance, compliance and risk management; how to implement integrated risk management; measuring, managing and hedging market, and more.

(Key topics: organic chemistry, hydrocarbons, black gold, benzene, organic acids, ethers, plastics, alcohol, changing molecules, carbohydrates, nitrogen compounds, fibers, vitamins, protein, colloids, Pasteur, Baekeland, Eijkman) IPC consists of twelve chapters of text and twelve companion student activity books. This course introduces students to the people, places and principles of physics and chemistry. It is written by internationally respected scientist/author, John Hudson Tiner, who applies the vignette approach which effectively draws readers into the text and holds attention. The author and editors have deliberately avoided complex mathematical equations in order to entice students into high school level science. Focus is on the people who contributed to development of the Periodic Table of the Elements. Students learn to read and apply the Table while gaining insight into basic chemistry and physics. This is one of our most popular courses among high school students, especially those who have a history of under-performance in science courses due to poor mathematical and reading comprehension skills. The course is designed for two high school transcript credits. Teachers may require students to complete all twelve chapters for two transcript credits or may select only six chapters to be completed for one transcript credit for Physical Science, Physics, or Chemistry. Compliance with state and local academic essential elements should be considered when specific chapters are selected by teachers. As applicable to local policies, transcript credit may be assigned as follows when students complete all 12 chapters: Physical Science for one credit and Chemistry for one credit, or Integrated Physics and Chemistry for two credits. (May require supplemental local classes/labs.)

Here is a chapter from The Six Sigma Way, which reveals how GE, Motorola, and numerous other companies are successfully using Six Sigma to fine-tune products and processes, improve performance, and increase profits. Now you can read the roadmap for implementing Six Sigma in your manufacturing or service organization. The authors--who have worked with some of the most visible Six Sigma companies including GE--provide step-by-step guidance and practical implementation guidelines.

This chapter comes from the book The Handbook of Structured Finance, a complete guide to the major issues facing investors in the structured finance market. Comprehensive and accessible, it provides the latest techniques for measuring and managing risk, finding optimum pricing, and taking advantage of leverage and market incompleteness, as well as models for debt and equity modeling.

This chapter comes from ETF Strategies & Tactics, which provides a detailed account of exchange-traded funds (ETFs), covering how they work, their distinctive characteristics, who trades them, who owns them, and their advantages and disadvantages. The authors present techniques for determining the viability of specific ETF funds, including their value in sector investing and international investing. This authoritative reference will keep you on top of your game by providing focused decision-making techniques that help determine the viability of any ETF, including its value in sector and international investing.

This set provides the consumable Student Edition, Volume 2, which contains everything students need to build conceptual understanding, application, and procedural skill and fluency with math content organized to address CCSS. Students engage in learning with write-in text on vocabulary support and homework pages, and real-world problem-solving investigations.

Here is a chapter from an updated Design for Six Sigma, Second Edition, which has extensive new chapters and learning modules on innovation, lean product development, computer simulation, and critical parameter management--plus new thread-through case studies. This updated edition provides unrivalled real-world product development experience and priceless walk-throughs that help you choose the right design tools at every stage of product and service development. The book includes detailed directions, careful comparisons, and work-out calculations that make every step of the Design for Six Sigma process easier.

Here is a sample chapter from Lifespan Investing, which lays out a successful path for creating wealth over your lifetime. Veteran author and trader Clifford Pistoletse deftly explains the need for this approach and the techniques for maximizing wealth at every age, stage of life, and market condition. Presenting an age-based portfolio management plan, Pistoletse shows how to take advantage of capital gains opportunities during bull markets, avoid loss of capital during bear markets, and increase assets and income flow during range-bound markets.
