From bank bailouts to austerity, Europe's and Ireland's response to the economic crisis has been engineered specifically to shift the burden of paying for the crisis onto ordinary citizens while investors, financiers, bankers and the privileged are protected. The authors expose the class-based nature of Ireland's crisis resolution.

Fifteen years after the adoption of UN Security Council Resolution 1325 which establishes the Women, Peace and Security agenda, there is now a need to assess the impacts of gender equality efforts, and to understand why and how gender equality reforms have advanced to the extent that they have. This book examines how international peace and security is re-envisioned from a gender perspective by mostly focusing on the nuances presented by the Asia Pacific region. It argues that despite the diversity of political, socio-cultural and economic systems in the Asia Pacific, women and girls in the region continue to experience similar forms of insecurities. Several countries in the Asia Pacific have demonstrated relative peace and stability. In addition, women's leadership and participation in peacebuilding are and continue to be increasingly recognized in the region too. However, as the chapters in this book demonstrate, applying a critical gender analysis allows for the interrogation of 'veneers' of political order which can then mask or normalise everyday gendered insecurities. The analysis of country cases such as Myanmar, Cambodia and Fiji underscores a rethinking of the political order in the Asia Pacific which leaves existing gender inequalities intact. The chapters in this book were originally published in a special issue in the International Feminist Journal of Politics.

Origination: The Geographies of Brands and Branding offers innovative theoretical and conceptual frameworks relating to the ways that actors create meaning and value in commodity brands and branding through processes of geographical association. Provides innovative conceptualization and theorization to facilitate an understanding of the geographical dimensions of brands and branding Challenges current interpretations of brands as vehicles of homogenization in globalization Establishes the theoretical and conceptual foundations of a more geographically sensitive approach through rigorous empirical examination of the under-researched geographical differentiation of commodity brands and branding Presents innovative new research and analysis of the socio-spatial biographies of the Newcastle Brown Ale, Burberry and Apple brands Forges strong new connections between political and cultural economy approaches within geography Provides a distinctive and incisive conceptual and theoretical framework capable of engaging other branded commodities and their branding in other times and places

The Drone Debate offers a thorough investigation of the where, why, how, and when of the U.S.'s use of UAVs. Beginning with a historical overview of the use of drones in warfare, it then addresses whether targeted killing operations are strategically wise, whether they are permissible under international law, and the related ethical issues. It also looks at the political factors behind the use of drones, including domestic and global attitudes toward their use and potential issues of proliferation and escalation. Finally, the use of drones by other countries, such as Israel and China, is examined. Each chapter features a case study that highlights particular incidents and patterns of operation in specific regions, including Yemen, Somalia, Pakistan, and Libya and strike types (signature strikes, personality strikes, etc.).

This comprehensive and versatile book covers both international criminal law and the application of US criminal law transnationally. It has chapters on each of the core crimes (aggression, genocide, crimes against humanity, war crimes), as well as separate chapters on the international tribunals from Nuremberg on and the ICC. Other chapters treat modes of liability, defenses, crimes against women, and alternatives to criminal prosecution in post-conflict societies. Thus the book can be used for courses focusing entirely on international criminal law and accountability for core crimes. But it also covers US criminal law in transnational contexts, including money laundering, Foreign Corrupt Practices Act, and terrorism. In addition, it includes chapters on extradition, evidence gathering abroad, comparative criminal procedure and comparative sentencing, and US constitutional rights abroad. Introductory chapters on the nature of international criminal law, transnational jurisdiction, and the basics of public international law make the book accessible to students with no prior background. New to the 3rd Edition: Recent developments in the international tribunals, including the Habré trial in the African Extraordinary Chamber Updates on post-Morrison jurisdictional developments and the treatment of jurisdiction in the Restatement (Fourth) of the Foreign Relations Law of the United States Activation of the crime of aggression by the ICC; cyber-attacks as aggression Recent war crimes jurisprudence and the treatment of war crimes in the US Department of Defense Law of War Manual A thorough revision of the ICC chapter including the Lubanga sentencing decisions and the Comoros decision on gravity Recent ICC jurisprudence on modes of liability Latest FCPA prosecution standards New cases on immunities and extradition Professors and students will benefit from: Versatility: Can be used for courses on international criminal law, and also for courses on US criminal law applied across borders Self-contained introductory chapters on basic public international law, transnational jurisdiction, and the nature of criminal law Detailed treatment of "headline" issues including torture, terrorism, and war crimes Readable background on historical context Teaching materials include: Comprehensive teacher's manual, including the authors' own teaching notes Discussion problems

In the Anthropocene, the thawing of frozen earth due to global warming has drawn worldwide attention to permafrost. Contemporary scientists define permafrost as ground that maintains a negative temperature for at least two years. But where did this particular conception of permafrost originate, and what alternatives existed? The Life of Permafrost provides an intellectual history of permafrost, placing the phenomenon squarely in the political, social, and material context of Russian and Soviet science. Pey-Yi Chu shows that understandings of frozen earth were shaped by two key experiences in the Russian Empire and the Soviet Union. On one hand, the colonization and industrialization of Siberia nourished an engineering perspective on frozen earth that viewed the phenomenon as an aggregate physical structure: ground. On the other, a Russian and Soviet tradition of systems thinking encouraged approaching frozen earth as a process, condition, and space tied to planetary exchanges of energy and matter. Aided by the US militarization of the Arctic during the Cold War, the engineering view of frozen earth as an obstacle to construction became dominant. The Life of Permafrost tells the fascinating story of how permafrost came to acquire life as Russian and Soviet scientists studied, named, and defined it.

The last twenty years have seen an increase in European integration and the emergence of the technological revolution. Although tighter integration coupled with technological innovation should facilitate cross-regional convergence, some European regions have managed to jump ahead while others have been left behind. This book examines the regional characteristics that favour growth and analyses the relevance of innovation, socio-economic and structural factors in shaping regional economic disparities. In this book, particular attention is devoted to the EU enlargement towards the East, to its consequences on Europe's traditional North-South divide, and to the increasing regional disparities in new member states after the transition. It demonstrates the growing importance of innovation and human capital in explaining the increase in income and employment disparities in old EU members, particularly after the 2008 financial crisis. It also shows that for newcomers, regional disparities

are essentially linked to socio-economic factors as capital regions approach Western standards, while others - mainly old industrial regions and peripheral ones - lag behind. This book integrates theoretical discussion with empirical evidence and will appeal to regional scientists interested in regional inequalities, and to policy makers concerned with devising effective strategies to tackle regional disparities in Europe.

This edited volume examines the continued viability of international human rights law in the context of growing transnational law enforcement. With states increasingly making use of global governance modes, core exercises of public authority such as migration control, surveillance, detention and policing, are increasingly conducted extraterritorially, outsourced to foreign governments or delegated to non-state actors. New forms of cooperation raise difficult questions about divided, shared and joint responsibility under international human rights law. At the same time, some governments engage in transnational law enforcement exactly to avoid such responsibilities, creatively seeking to navigate the complex, overlapping and sometimes unclear bodies of international law. As such, this volume argues that this area represents a particular dark side of globalisation, requiring both scholars and practitioners to revisit basic assumptions and legal strategies. The volume will be of great interest to students, scholars and practitioners of international relations, human rights and public international law.
