James Taylor is a professional motoring writer with over thirty years' experience and Mercedes-Benz is one of his favourite car manufacturers.

DIVA garage is a special place-not home, not office, not rec room. It may combine elements of all of these, yet it remains unique. Dreams are born, housed, revived, and realized within the walls and beneath the rafters of an enthusiast's garage. It is a haven from life's broader concerns, where work is not really work, and virtually anything seems possible.Dream Garages explores this hallowed space, taking the reader into 21 motorhead havens, where automotive and motorcycle enthusiasts store and work on the objects of their passion. Some of the structures are expansive, some more modest; some are working garages, others near spotless showcases of pristine machines and automotive art work and memorabilia. Pervading all of them is a love of the motor vehicle and an appreciation for the structure that allows us to harbor and revive them.Here readers will find enthusiasts who collect, preserve, and work on sports cars, race cars, motorcycles, trucks, speed record vehicles and related machinery, and treasures. Reversed names like Ferrari, Corvette, Road Runner, Cobra, and Jaguar dwell in these special spaces. Dream Garages is not a manual on building a great garage; it's a look at the ideas and passions that can make any garage great. Dream Garages is the Architectural Digest for those whose veins run with gasoline./div

Designed by Mercedes's head of design Bruno Sacco, the W124 range immediately became the benchmark by which medium-sized car models were judged in the late 1980s due to its engineering excellence and high build quality. There was a model to suit every would-be-buyer, from the taxi driver through the family motorist and on to those who were willing and able to pay for luxury and performance. This book covers: design, development and manufacture of all models of W124 including estates, cabriolets and the stylish coupe range; engines and performance; special editions and AMG models and, finally, buying and owning a W124 today. Superbly illustrated with 264 colour photographs.

Trevor Kerry draws together contributions from leading academics in the field based in Europe, Canada and Australia to examine key themes in higher education, including: • academic freedom • leadership and management • the nature of learning and teaching • ethical behaviour • curriculum innovation • attitudes to globalization and internationalization The contributors explore what might constitute effective higher education provision, drawing on innovative practice from around the world and encouraging higher education practitioners to become more analytical and critical about their institutions, about their own roles, and about the ways in which they and their work serve their client-base. In so doing the book confronts the contextual conflicts that arise from political, social and fiscal agendas for higher education.

The first in a series of five books which chronicle in definitive depth the history of the evergreen 911, from the earliest design studies to the water-cooled cars of today. This volume covers original design, the 901 prototype, the early 911s (including 912s) and the 2.2 litre cars.

The Datsun 240Z inspired a generation of enthusiasts, outselling and outperforming almost all of its contemporaries. This book covers the full story of the Datsun sports cars, from the Fairlady roadsters through to the final 280ZX production model, illustrated throughout with contemporary material.
