me, and it will move and enthrall anyone who has ever entered the glorious literary world of Gabriel García Márquez.”—Salman Rushdie

“In *A Farewell to Gabo and Mercedes* Rodrigo Garcia finds the words that cannot be said, the moments that signal all that is possible to know about the passage from life to death, from what love brings and the loss it leaves. With details as rich as any giant biography, you will find yourself grieving as you read, grateful for the profound art that remains a part of our cultural heritage.”—Walter Mosley, *New York Times* bestselling author of *Down the River Unto the Sea* “An intensely

personal reflection on [Garcia's] father's legacy and his family bonds, tender in its treatment and stirring in its brevity.”—Booklist (starred review) The son of one of the greatest writers of our time—Nobel Prize winner and internationally bestselling icon Gabriel García Márquez—remembers his beloved father and mother in this tender memoir about love and loss. In March 2014, Gabriel García Márquez, one of the most acclaimed writers of the twentieth century, came down with a cold. The woman who had been beside him for more than fifty years, his wife Mercedes Barcha, was

not hopeful; her husband, affectionately known as “Gabo,” was then nearly 87 and battling dementia. I don't think we'll get out of this one, she told their son Rodrigo. Hearing his mother's words, Rodrigo wondered, “Is this how the end begins?” To make sense of events as they unfolded, he began to write the story of García Márquez's final days. The result is this intimate and honest account that not only contemplates his father's mortality but reveals his remarkable humanity. Both an illuminating memoir and a heartbreaking work of reportage, *A Farewell to Gabo and Mercedes* transforms this towering

genius from literary creator to protagonist, and paints a rich and revelatory portrait of a family coping with loss. At its center is a man at his most vulnerable, whose wry humor shines even as his lucidity wanes. Gabo savors affection and attention from those in his orbit, but wrestles with what he will lose—and what is already lost. Throughout his final journey is the charismatic Mercedes, his constant companion and the creative muse who was one of the foremost influences on Gabo's life and his art. Bittersweet and insightful, surprising and powerful, *A Farewell to Gabo and Mercedes* celebrates the

formidable legacy of Rodrigo's parents, offering an unprecedented look at the private family life of a literary giant. It is at once a gift to Gabriel García Márquez's readers worldwide, and a grand tribute from a writer who knew him well. "You read this short memoir with a feeling of deep gratitude. Yes, it is a moving homage by a son to his extraordinary parents, but also much more: it is a revelation of the hidden corners of a fascinating life. A Farewell to Gabo and Mercedes is generous, unsentimental and wise." —Juan Gabriel Vásquez, author of *The Sound of Things Falling* "A warm homage

World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies,

industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine "smart factories" in which global systems of manufacturing are coordinated virtually, or

The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future--one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators

Why do smart and experienced leaders make flawed, even catastrophic, decisions? Why do people keep believing they have made the right choice, even with the disastrous result staring them in the face? And how can you be sure you're making the right decision--without the benefit of hindsight? Sydney Finkelstein, Jo Whitehead, and Andrew Campbell show how the usually beneficial

processes of the human mind can become traps when we face big decisions. The authors show how the shortcuts our brains have learned to take over millennia of evolution can derail our decision making. Think Again offers a powerful model for making better decisions, describing the key red flags to watch for and detailing the decision-making safeguards we need. Using examples from business, politics, and history, Think Again deconstructs bad decisions, as they unfolded in real time, to show how you can avoid the same fate.

Wastebook 2014 - the report Washington doesn't want you to read - reveals the 100 most outlandish government expenditures this year, costing taxpayers billions of dollars. "With no one watching over the vast bureaucracy, the problem is not just what Washington isn't doing, but what it is doing." Dr. Coburn said. But even if the politicians won't stop stupid spending, taxpayers always have the last word."Congress actually forced federal agencies to waste billions of dollars for purely parochial, political purposes. For example, lawmakers attached a rider to a larger bill requiring NASA to build a \$350 million launch pad tower, which was mothballed as soon as it was completed because the rockets it was designed to test were scrapped years ago.
