Looks at how foreigners were regarded in three ancient civilizations, finding that cultural, not biophysical, differences were key in distinguishing "us" from "them." *Enemies of Civilization* is a work of comparative history and cultural consciousness that discusses how "others" were perceived in three ancient civilizations: Mesopotamia, Egypt, and China. Each civilization was

the dominant culture in its part of the world, and each developed a mind-set that regarded itself as culturally superior to its neighbors.

Mu-chou Poo compares these societies' attitudes toward other cultures and finds differences and similarities that reveal the self-perceptions of each society.

Notably, this work shows that in contrast to modern racism based on biophysical features, such prejudice did not exist in these ancient societies. It was culture rather than biophysical nature that was the most important criterion for distinguishing us from them. By examining how societies conceive their prejudices, this book breaks new ground in the study of ancient history and opens new ways to look at human society, both ancient

and modern. Mu-chou Poo is Professor and Research Fellow in the Institute of History and Philology at Academia Sinica in Taiwan. He is the author of several books, including *In Search of Personal Welfare: A View of Ancient Chinese Religion*, also published by SUNY Press.

The ancient world of Mesopotamia (from Sumer to the subsequent division into Babylonia and Assyria) vividly comes alive in this portrayal of the time period from 3100 bce to the fall of Assyria (612 bce) and Babylon (539 bce). Students, teachers, and interested readers will discover fascinating details about the lives of these people taken from the ancients' own quotations and

descriptions. These detailed anecdotes from the people themselves easily convey factual material. A wealth of information is provided on such varied topics as: education; literature; mathematics and science; city vs. country life; family life; and religion, as well as many other subjects.

"This splendid work of scholarship . . . sums up with economy and power all that the written record so far deciphered has to tell about the ancient and complementary civilizations of Babylon and Assyria."—Edward B. Garside, New York Times Book Review Ancient Mesopotamia—the area now called Iraq—has received less attention than ancient Egypt and other long-extinct and more spectacular

civilizations. But numerous small clay tablets buried in the desert soil for thousands of years make it possible for us to know more about the people of ancient Mesopotamia than any other land in the early Near East. Professor Oppenheim, who studied these tablets for more than thirty years, used his intimate knowledge of long-dead languages to put together a distinctively personal picture of the Mesopotamians of some three thousand years ago. Following Oppenheim's death, Erica Reiner used the author's outline to complete the revisions he had begun. "To any serious student of Mesopotamian civilization, this is one of the most valuable books ever written."—Leonard Cottrell, Book Week "Leo Oppenheim has

made a bold, brave, pioneering attempt to present a synthesis of the vast mass of philological and archaeological data that have accumulated over the past hundred years in the field of Assyriological research."—Samuel Noah Kramer, Archaeology A. Leo Oppenheim, one of the most distinguished Assyriologists of our time, was editor in charge of the Assyrian Dictionary of the Oriental Institute and John A. Wilson Professor of Oriental Studies at the University of Chicago.

This book represents the first comprehensive, interdisciplinary presentation of ancient Near Eastern civilization. The author's study includes treatments of the history of language and systems of

For decades, scholars have struggled to understand the complex relationship between pastoral nomadic tribes and sedentary peoples of the Near East. The Oriental Institute's fourth annual post-doc seminar (March 7-8, 2008), *Nomads, Tribes, and the State in the Ancient Near East*, brought together archaeologists, historians, and anthropologists to discuss new approaches to enduring questions in the study of nomadic peoples, tribes, and states of the past: What

social or political bonds link tribes and states? Could nomadic tribes exhibit elements of urbanism or social hierarchies? How can the tools of historical, archaeological, and ethnographic research be integrated to build a dynamic picture of the social landscape of the Near East? This volume presents a range of data and theoretical perspectives from a variety of regions and periods, including prehistoric Iran, ancient Mesopotamia and Egypt, seventh-century Arabia, and nineteenth-century Jordan.

Describes the Ancient Mesopotamians and their myths with factual explanations about how people really lived at the time.

This book explores the roles of mobile and sedentary members of the ancient world in ancient Mesopotamia.

In this book Professor Woolley, one of the world's foremost archaeologists, shows quite clearly that when Egyptian civilization began the civilization of the Sumerians had already flourished for at least 2,000 years. The idea that Egypt was the earliest civilization has been entirely exploded. The Sumerians had

reached a very high level of culture by 3500 B.C.E., and may be said with some justice to be the forerunners of all the Old World civilizations of Egypt, Assyria, Asia Minor, Crete, and Greece. This book will appeal to everyone interested in the early history of humankind.
