book *The Hidden Messages in Water* published in 2004 was a New York Times best seller. Emoto's conjecture evolved over the years, and his early work revolved around pseudo-scientific hypotheses that water could react to positive thoughts and words and that polluted water could be cleaned through prayer and positive visualization. From 1999,

Masaru Emoto ' s 15 extensive years of study on water has given him the background to discuss what water is, how it has been implicated in the creation of the universe, and why a perfect ratio of Love and Gratitude can help this energy can go on infinitely. This fascinating book explains how our prayers, goodwill, and positive words heal us humans—as well as viruses and the universe as a whole—through water. Dr. Emoto explains that the fact that water has lost its true form shows that our way of living has moved away from God ' s will, so we should be aware of our Creator ' s alert to "correct the way we are living now." The information in this work is an

important step in revealing how we can modify our way of living to bring about true peace on earth.

In this New York Times bestseller, internationally renowned Japanese scientist Masaru Emoto shows how the influence of our thoughts, words and feelings on molecules of water can positively impact the earth and our personal health. This book has the potential to profoundly transform your world view. Using high-speed photography, Dr. Masaru Emoto discovered that crystals formed in frozen water reveal changes when specific, concentrated thoughts are directed toward them. He found that water from clear springs and water that has been exposed to loving words shows brilliant, complex, and colorful snowflake patterns. In contrast,

polluted water, or water exposed to negative thoughts, forms incomplete, asymmetrical patterns with dull colors. The implications of this research create a new awareness of how we can positively impact the earth and our personal health.

From its arrival on earth to the vast areas it traverses before emptying into the sea, water holds all the knowledge and experience it has acquired. As phenomenal as it may seem, water carries its whole history, just as we carry ours. It carries secrets, too. In *The Secret Life of Water*, bestselling author Masaru Emoto guides us along water 's remarkable journey through our planet and continues his work to reveal water 's secret life to humankind. He shows how we can

apply its wisdom to our own lives, and how, by learning to respect and appreciate water, we can better confront the challenges that face the twenty-first century—and rejuvenate the planet.

The common language that the people of the world have been seeking is found in water crystals. Water speaks for what is in our mind. Water awakens the subconscious memory in each person. . . . I now know why water is indispensable to the phenomenon of life, and why alternative therapies exist and why they're effective. Water helped me understand religion and prayer and gave me a clue to understanding the nature of energy. It helped me understand the relationship between humanity and the cosmos. It gave me

a clue to help me understand what dimensionality is. I could come one step closer to understanding the eternal theme of humanity that asks where we come from, why we are here, and what happens when we die. Thus, for the release of this, the third volume in my series of The Message from Water, I decided to choose what the world most urgently needs at present as a theme. That is, of course, the need to eliminate war and terrorism throughout the world. The theme I have chosen is prayer.' When I thought about it more deeply, I realized that prayer is most effectively sent when each person in the world raises their energy of love by imagining a scene where the peoples of the world are living in peace. I've been taught this through the process of asking water many questions. For

this reason, the title of this book is 'Love Thyself.' First you must shine with positive, high-spirited vibrations, and be full of love. In order to do that, I think it's important to love, thank, and respect yourself. If that's the case, then each of those vibrations will be sent out into the world and the cosmos, and the great symphony of that harmonic vibration will wrap our planet in waves of love that serve to cherish our Heaven-granted lives. This is the message from water.

Research confirms that when people feel appreciation, good things happen to their minds, heart, and bodies. But appreciation is much more than a feel-good mantra. It is an actual force, an energy that can be harnessed and used to transform our daily life—relationships, work, health and

open a new world of possibilities for you -- just as my research has done for me. In this book you will learn of the unique properties of water and its ability to improve your health and your life. You will see the effect each of us has on water -- not only the water we drink but also the water that makes up 70 percent of the human body and, most importantly, what happens to that water as we interact with each other. 2005 marks the beginning of the United Nations Decade of Water. It is our individual responsibility to learn all we can about water, the most precious resource on our planet, and to help shift the consciousness through our thoughts, through our words and prayers, and through our commitment to respect each other with love and gratitude. May our understanding of

water help bring peace to all
humankind. Masaru Emoto

Based on supermodel Georgie Badiel ' s childhood, a young girl dreams of bringing clean drinking water to her African village With its wide sky and warm earth, Princess Gie Gie ' s kingdom is a beautiful land. But clean drinking water is scarce in her small African village. And try as she might, Gie Gie cannot bring the water closer; she cannot make it run clearer. Every morning, she rises before the sun to make the long journey to the well. Instead of a crown, she wears a heavy pot on her head to collect the water. After the voyage home, after boiling the water to drink and clean with, Gie Gie thinks of the trip that tomorrow will bring. And she dreams. She dreams of a day

when her village will have cool, crystal-clear water of its own. Inspired by the childhood of African-born model Georgie Badiel, acclaimed author Susan Verde and award-winning author/illustrator Peter H. Reynolds have come together to tell this moving story. As a child in Burkina Faso, Georgie and the other girls in her village had to walk for miles each day to collect water. This vibrant, engaging picture book sheds light on this struggle that continues all over the world today, instilling hope for a future when all children will have access to clean drinking water.

This book outlines the beginning of Dr. Emoto's work, how he came upon his idea of photographing water crystals, how the environment influences water, problems with

contamination, and quality. He then moves onto pictures of the crystals when subjected to sounds, music, and voices. Printed in English 2005.

The Hidden Messages in Water introduced readers to the revolutionary work of Japanese scientist Masaru Emoto who discovered that molecules of water are affected by thoughts, words, and feelings, as can be seen in his dramatic photographs of water crystals. As a companion to the book, the Water Crystal Oracle includes forty-eight beautiful water crystal images to enhance your life and balance your well-being in many ways.

With his unique water research Dr. Emoto lectures how we can
